## PREFACE.

THE ever-increasing demand for capitals, the crowning detail of columns for exterior and interior use for refined architectural structures, has prompted us to issue this exclusive book of Capitals and Brackets, which we manufacture in the different materials, viz.:

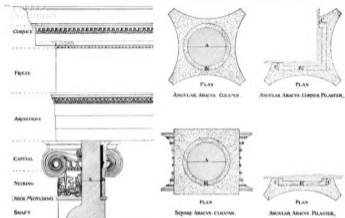

1. Exterior composition.
2. Interior composition in connection with woodwork.
3. Fibrous Plaster in connection with plaster finish.

We point with pride to the fine examples of Capitals and Brackets as illustrated in this catalogue, ranging in style from the Grecian and Roman classics, the mediæval ages, to the different periods of Renaissance as practiced most successfully by the Italians, the French, and our modern architects. We have aimed to bring forward in this book a great number of correct specimens of those periods to enable the architects and builders to select the nearest example to the requirements of their building from our large stock of models, which will admit of getting, at a very reasonable cost, the exact desired result. The different materials we have heretofore mentioned are so inexpensive that even the simplest building need not go without the refinement of a few of our Capitals, be it either on the exterior or interior (consols, sideboards, mantels, door and window trims, etc.). We respectfully request architects to kindly specify our Capitals and Brackets as illustrated, mentioning our number and size on plans, and the trouble and time making details will be avoided, as well as the increased expense for executing special models. One trial with us will convince the profession that our goods fully come up to the highest standard. We have made this part of our business a special study for years, and claim we have the correct knowledge of the design, material, and architectural uses of Capitals and Brackets. We will at any time submit samples to architects or builders who desire to give our goods a thorough test, and have the confidence to count those among our customers who have tested the merits of our products.

THE DECORATORS SUPPLY CO.

We have copyrighted all the designs in this catalogue to protect ourselves against reproduction without our permission.

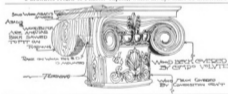

450078

A indicates the core, or extended shaft running through Capital.

B shows the thickness of our material.

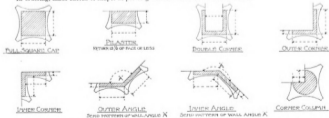

C indicates return of Pilaster Capital, which always must be mentioned in ordering Pilaster Capitals.

This cut shows the scientific construction of our Wood and Compo Column and Pilaster Capitals.

#### DIAGRAM SHOWING ODD SHAPED CAPS.

In ordering, make sketch of shapes as per diagram below and fill in sizes as shown.

## EXPLANATION AND INSTRUCTIONS.

THE opposite page illustrates one of our Modern Ionic Capitals with necking, "Empire," as applied to a column showing the wood shaft and core running through the Capital supporting the entablature above. The plans of the different abacus forms as given will serve as a further illustration of the relative position of shaft and our material. All our Capitals are furnished as shown in the catalogue, each Capital having a complete finish to connect with shaft. The diameter given in catalogue represents the top of column. The width represents the top of pilaster. The height given is the exact height of Capital. Always allow a trifle more height for your core, so the weight will rest on shaft, and not on Capital— $\frac{5}{8}$  of an inch up to a 10-inch diameter,  $\frac{1}{4}$  of an inch above that size, will be sufficient to insure a safe application.

The thickness of our material is 1 inch up to a 10-inch diameter Capital, making the core of a 10-inch diameter Capital 8 inches; of an 8-inch Capital, 6 inches. Above 10 inches allow  $\frac{5}{8}$  of an inch more for the thickness of material for every 2 inches of increased size, making core for a 14-inch diameter Capital 11 $\frac{5}{8}$  inches; a 16-inch Capital, 15 $\frac{1}{4}$  inches, etc.

In ordering Capitals, give name, number, and size of diameter of width. Also state material wanted, viz.:

Exterior composition, warranted to stand in any climate.

Interior composition, made with grain to match any wood, having a solid wood body, requires no core on column. Always state the kind of wood and finish.

Fibrous plaster used in conjunction with interior plaster finish.

The sizes of our brackets given are:

1. The entire width across abacus moulding.
2. Width of face on body without moulding.
3. Drop or length.
4. Projection.

We are constantly adding new sizes to our stock, and will make any sizes desired not listed, upon special request, and also carry a number of odd styles and sizes of Capitals and Brackets, designs of which will be sent on application. Special designs submitted will receive correct and careful execution.

IN presenting this catalogue to the trade, we wish to emphasize the fact that the kind of goods shown herein are only a small percentage of our productions. As we embody the different articles we manufacture in separate catalogues, we have refrained from illustrating any other in this book, and therefore mention here the different branches of our manufacture, viz.:

1. Exterior composition.
2. Interior fibrous plaster in connection with plaster finish.
3. Interior composition in conjunction with woodwork.
4. Grille work.

Exterior composition is used very extensively for the ornamental features of buildings, and for that purpose has taken the place of much more expensive materials. It is very durable and easily applied. It combines with a very low price a very artistic finish. Its manifold uses for Capitals, Brackets, Cornices, Friezes, Panels, Arches, Shells, and Gables fill a constantly increasing demand by the profession. We can refer to a great number of fine buildings beautified by us with this class of goods.

The interior decorations of public buildings, theaters, churches, and residences of to-day require a great deal of relief ornamentation for their refined finish. The manufacture of these goods made of fibrous plaster forms a great part of our business. The immense possibility of this inexpensive material as a decorative medium has made it stand foremost in the minds of architects searching for an ornamental finish at a reasonable cost. No up-to-date building can lay claim to any architectural or decorative prominence without a liberal use of this class of ornamentation in its interior. This part of our manufacture is immensely increasing as the nature of it becomes more and more understood. We can proudly claim hundreds of architects that have made use of the possibilities of these goods, and cannot say too much in praise of it. We have issued a special catalogue for interior ornamentations, which contains on its 180 pages several thousand illustrations, showing every form or style of ornaments known to history. We devote special catalogues to this class of work.

The interior composition we have several times referred to in the Preface forms quite a part of our output; when properly applied and finished, will give exactly the same results as wood carving, having the same grain; when filled represents any wood used, as oak, mahogany, birch, etc. It would deceive an expert to distinguish the fine examples of this class of goods in our show rooms from wood carvings. Our thousands of models, running in style through all architectural periods known, enable us to make almost any conceivable design to imitate wood carving on interior woodwork, such as windows and door trims, sideboards, consols, mantels, etc. The very fact that this material is so inexpensive has made it possible that almost any building has a liberal amount of this ornamentation distributed all over its interior wood finish. We cannot say too much of its merits as a decorative medium on woodwork, and would like to invite the trade to make a trial with it in order to be convinced.

We have issued a special catalogue of fret or grille work, which has stood the criticism of the best people using this kind of ornamentation for beautifying houses. We would like it understood that we aim to manufacture this article in any design and style to meet the general scheme of the interior decoration. We finish these goods in any color or wood. A fine grille is always a highly desirable ornamentation for openings between rooms. We justly lay claims to the distinction of being the foremost people in this country in the manufacture of these goods.

In conclusion, we wish to state that our range of manufacture covers almost every conceivable relief ornamentation known to the art of architecture, except in stone and metal. For this class of work we, however, furnish the models necessary.

We respectfully invite all interested in the ornamental arts of building to visit our establishment, to be convinced that we are the largest and most advanced manufacturers of relief ornamentation in its various branches in the United States.

## THE DECORATORS SUPPLY CO.

We have excellent facilities for furnishing special designs quickly. Estimates given on application.

ILLVSTRATED CATALOGVE  
OF  
COMPO ORNAMENTS  
FOR  
WOODWORK AND INTERIOR  
DECORATION

MANUFACTURED BY  
THE DECORATORS SVPPLY CO.  
ARCHER AVE. AND LEO ST.  
CHICAGO, ILL.

## PREFACE

COMPO ornaments, or imitation wood-carvings, have made for themselves a place of diversified usefulness in ornamenting wood constructed articles, or for fine ceiling and wall decorations, to such a great extent of late years, that we feel encouraged to devote a special catalog to this class of ornamentation, which we herewith present to the trade.

The illustrations in this book are taken from sample boards, photographed directly on the metal plates and half-tones made therefrom, so that the articles shown are almost as well presented to the eye as if the goods were seen.

We believe to have brought out the finest collection of ornaments ever assembled together in this line, and trust the illustrations will bear out this statement.

We have endeavored to make said collection as comprehensive and diversified as our experience has taught us same should be, and have spared no effort, study, or expense to get together a most useful and artistic ensemble. Our aim is to have models of almost every conceivable form or style of ornament ever designed and a number of different sizes of each.

We are continually adding to our stock of new models, and any ornament not found in this book we may either have models for, or same may be procured on short notice.

We have a staff of competent designers and carvers working for us, making new patterns all the time.

Compo ornaments can be used to imitate wood carvings on all doors, windows, mantels, consoles, and furniture of every kind and description, and readily stained to match the wood, so that no expert could be able to tell what part of the article is wood or Compo.

For gilded or white enameled woodwork or furniture, no better adapted or less expensive ornamentation can be found. As an ornamentation for ceilings and walls, and especially for wall panels, it has a place by itself, noted for its delicate, fine, artistic detail, and also great durability.

For wall panels to be hung with silk and tapestry, the only ornamental framing adaptable is Composition on 3-ply veneer and ornamented wood mouldings rabbitted. See page 95.

For ornamenting railroad and street cars, steamships, etc., Compo has been extensively employed on account of its greater durability and fitness, being readily bent into any shape or curve.

Compo ornaments are almost exclusively used now in all places where wood-carvings were formerly employed. They are much less expensive, more durable, and fully as artistic, the greatest care having been bestowed in design and execution to bring about the finest results in our stock models.

Give Compo a good try-out.

When ordered from us it will show the best results.

We guarantee it to endure all reasonable wear and handling and not to crack.

We use only the very best material in making it.

The largest and most artistic assortment of fine models are at your service, without special charge for same.

Our unexcelled facilities insure to you the smoothest and quickest service obtainable.

THE DECORATORS SUPPLY CO.

## INDEX OF ALL ORNAMENTS SHOWN IN CATALOG

Round, square and oval Rosettes	5000 to 5268.
Panel Ornaments	5533 to 5549.
Shields	5550 to 5602.
Vases and Shells	5734 to 5799.
Torches, Musical Instruments and Fleur de Lis	5800 to 5873.
Honeysuckle Crestings, Stair Risers and Bracket sides	6021 to 6099.
Ribbons	6100 to 6164.
Figure Ornaments and Heads	6315 to 6399.
Gothic Ornaments	6400 to 6434.
Leaves	6483 to 6789.
Drops	7027 to 7124.
Wreaths	7125 to 7232.
Festoons	7425 to 7549.
Pilaster and Panel Ornaments	7550 to 7760.
Scroll Friezes	7850 to 7875.
Bands and Honeysuckles	8166 to 8549.
Lamb's Tongues	8550 to 8658.
Egg and Darts	8833 to 8948.
Beads and Pearls	8950 to 9113.
Art Nouveau (New Art) Ornaments	9200 to 9241.
Louis XIV, XV, XVI French Renaissance Periods	9300 to 9522.
Wall Panel Ornaments	9800 to 9882.
Wall Panel Mouldings	9900 to 9995.
Window Cornices	10000 to 10012.
Door Heads	10092 to 10099.

## EXPLANATION AND INSTRUCTIONS FOR APPLICATION

**C**OMPO. The well-known name derived from composition is a pulp putty mixture made for interior ornaments only, and used principally as imitation wood-carving and for wall decorations. Properly mixed and steamed, it is pressed into wood forms and the Compo ornaments cast out therefrom. The wood forms or moulds are made from original wood-carvings, and contain the same sharpness of modeling and the grain effect of the originals. In turn, the Compo Ornaments retain the same points after casting them from said moulds. When properly applied (as specified hereafter) to woodwork, filled and stained, exactly the same finish is obtained, so that it is impossible to see what part is Compo or wood.

Compo takes every stain and filler as readily as wood.

Again, when a cast is made from a fine grained wood-carving, the Compo is serviceable for painted or enameled woodwork, or decorative wall and ceiling ornaments. The walls to be ornamented must be hung first with canvas or sheeting in order to insure a durable job. The Compo ornaments are then applied with hot glue or La Page glue to the canvas, and the ornaments nailed with small brads.

In applying Compo ornaments to woodwork proceed as follows: Take thin furniture glue, heated, apply same to the back of the ornament and stick the latter to the raw wood tightly. If you can steam the ornaments slightly by laying them on a cloth over a pan filled with hot water, they will become very flexible and adhere closer to the wood. We use this process in our own factory. Always apply the composition on the raw wood before filling or painting to insure close cohesion. Where a coat of paint has been applied, however, stick ornaments with burnt shellac and nail with small brads.

Do not order the ornaments to be shipped until you are ready to use them. They must be kept in a moistened, pliable state and not allowed to dry.

We ship them on corrugated paper boards in layers, wrapped with heavy paper to prevent the air from drying them.

The ornaments must not be moistened with water, being of a glue mixture.

Do not unpack the ornaments until you need them for mounting.

Compo ornaments are always sent by express, unless otherwise advised. They do not weigh much and are more carefully and quickly handled that way.

State the date of shipping when ordering. We can cast the average order on twenty-four hours' notice. The moulds are always ready for casting.

When ordering ornaments for combination panels for doors, sideboards, pilasters, etc., mention the style and design of ornamentation wanted, or select the nearest ornaments shown in the catalog, and we will mount a sample panel together and send it for your approval.

We also furnish a stencil or pounce to you for guidance in mounting the ornaments together.

We would advise our clients to either send us the woodwork or boards for complicated mountings, as we can much more carefully and economically handle same in our factory, or have us make such boards or woodwork receiving rich ornamentation. We are well equipped in our wood-working department for that work since we make all the woodwork for our Compo Capitals and Brackets in our own factory. See our special catalog for Caps and Brackets.

Competent workmen will be sent to any place for mounting Compo ornaments.

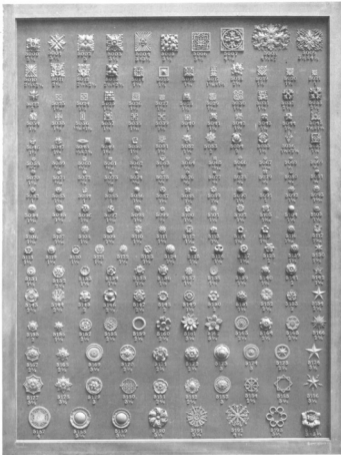

Special prices given on large contracts; send plans for figuring.

Artistic designs will be submitted by us for any ornamentation desired, on short notice. We have a staff of artistic designers carefully trained for that service. Will be pleased to furnish any further information wanted.

The Panel Ornaments shown on opposite page are mounted and numbered in a number of sets each. We will furnish a manual with the suggestions for your guidance in mounting sets. We have many additional sets and motifs, from which we can mount a great variety of panels, in different styles, forms and sizes. Send for special designs and prices and give your measurements. We would advise our clients to either send us the Woodwork or Boards for complicated mountings, as we can work more carefully and economically handle some in our factory. We have to make each Sample of Woodwork mounting, such ornamentation. We are well equipped in our Woodworking Department for that work, since we make all the wood parts for our Carved Capitals and Baseboards in our own factory.

PRICES SUBJECT TO DISCOUNT.

The lower ornaments shown on opposite page are composed of several parts to facilitate the mounting. We would recommend to our clients to send parts by accelerated mail-order to our factory.

PRICES SUBJECT TO INCREASE.

The flexibility of  
Sawtooth Cast Concrete  
makes it possible  
to lend ornaments  
such as these from  
various other  
forms.

\*Corner ornament includes wood moulding corner.

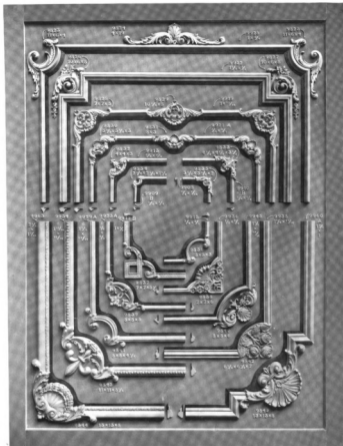

For all Mouldings see pages 24 and 25.

X Rabbeted for Tapestry strip. A mould for plain mouldings. We furnish for Tapestry Panels a Tapestry strip 1/2" x 1/2" which is to be nailed to the wall first, in connection with a slotted piece of wood for the corner and where necessary which we furnish. This nail and stretch the Tapestry on to wall strip. The corners and other ornaments, which are mounted on a ply corner by us and rabbeted to receive said strip are then nailed on the strip and finally the rabbeted mouldings also nailed on to the strip. We send our ornaments rabbeted on board. You can paint and finish them before applying to wall. Do not remove them from the boards and ready for putting up to avoid warping. The tapestry strips are shown in dark color in our illustration.

PRICES SUBJECT TO INCREASE.

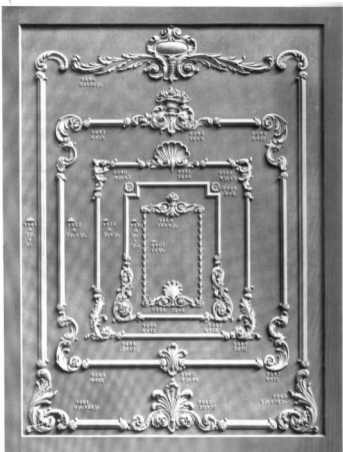

WOOD Moulding WITH  
TAPESTRY STRIP.

WALL PANELS WITH MOULDINGS AND TAPESTRY STRIP, THREE-PLY COMBINATION

Nearly all the

 For other Details see Case and Block Catalogue.  
 The special orders state width of trim and return or thickness of case.

DOOR AND WINDOW HEADS

**I**N presenting this catalogue to the trade, we wish to emphasize the fact that the kind of goods shown herein are only a small percentage of our productions. As we embody the different articles we manufacture in separate catalogues, we have refrained from illustrating any other in this book, and therefore mention here the different branches of our manufacture, viz.:

1. Exterior composition.
2. Interior fibrous plaster in connection with plaster finish.
3. Interior composition in conjunction with woodwork.
4. Grille work.

Exterior composition is used very extensively for the ornamental features of buildings, and for that purpose has taken the place of much more expensive materials. It is very durable and easily applied. It combines with a very low price a very artistic finish. Its manifold uses for Capitals, Brackets, Cornices, Friezes, Panels, Arches, Shells, and Gables fill a constantly increasing demand by the profession. We can refer to a great number of fine buildings beautified by us with this class of goods.

The interior decorations of public buildings, theaters, churches, and residences of to-day require a great deal of relief ornamentation for their refined finish. The manufacture of these goods made of fibrous plaster forms a great part of our business. The immense possibility of this inexpensive material as a decorative medium has made it stand foremost in the minds of architects searching for an ornamental finish at a reasonable cost. No up-to-date building can lay claim to any architectural or decorative prominence without a liberal use of this class of ornamentation in its interior. This part of our manufacture is immensely increasing as the nature of it becomes more and more understood. We can proudly claim hundreds of architects that have made use of the possibilities of these goods, and cannot say too much in praise of it. We have issued a special catalogue for interior ornamentations, which contains on its 100 pages several thousand illustrations, showing every form or style of ornaments known to history. We devote special catalogues to this class of work.

For the Compo for woodwork above referred to, we have devoted the catalogue herewith presented. It will speak for itself. Its usefulness as imitation wood carvings is unexcelled. We are manufacturing a fine line of woodwork in our own factory, well adapted for ornamenting with our Compo casts. Specially designed Mantels, Consoles, Mirror Frames, Sideboards, Door and Window Caps, richly ornamented with Compo ornaments, form quite a part of our manufacture. We make the very best in that line and finish the articles in any wood or in gold leaf, and finished or white enamel. We also make Tables, Chairs, Frames, Window Cornices, etc., ornamented and gilded finish, principally designed along the lines of the "Louis" periods of the French Renaissance.

We also manufacture a special line of Electric Light Fixtures, made of wood framework with Compo enrichment, and finish same completely finished in bronze or gold glazed effects to match any metal imitation desired.

Special designs will be promptly furnished for anything wanted in above given lines of our manufacture. We will shortly furnish a separate catalogue for that class of work.

We have issued a special catalogue of fret or grille work, which has stood the criticism of the best people using this kind of ornamentation for beautifying houses. We would like it understood that we aim to manufacture this article in any design and style to meet the general scheme of the interior decoration. We finish these goods in any color or wood. A fine grille is always a highly desirable ornamentation for openings between rooms. We justly lay claim to the distinction of being the foremost people in this country in the manufacture of these goods.

In conclusion, we wish to state that our range of manufacture covers almost every conceivable relief ornamentation known to the art of architecture, except in stone and metal. For this class of work we, however, furnish the models necessary.

We respectfully invite all interested in the ornamental arts of building to visit our establishment, to be convinced that we are the largest and most advanced manufacturers of relief ornamentation in its various branches in the United States.

## THE DECORATORS SUPPLY CO.

We have excellent facilities for furnishing special designs quickly. Estimates given on application.
