Victorian Sexual Dissidence

Edited by Richard Dellamora

"Richard Dellamora has brought together interesting and challenging essays that begin to outline a new shape for studies of 'sexual dissidence' in the Victorian period. By using this term, Dellamora is signaling his shift away from earlier gay critics and toward an understanding that is not based on sexual identity especially when it is conceived as binary. This strikingly innovative collection will make a clear mark for itself in Victorian studies."—Robert K. Martin, coeditor of *Queer Forster*

Smile of Discontent

Humor, Gender, and Nineteenth-Century British Fiction

Eileen Gillooly

"*Smile of Discontent* is a searching and persuasive account of humor and gender in nineteenth-century fiction, every bit as mordant, unnerving, and funny as the texts it illuminates. A splendid book."

THE BEST IN BRITISH STUDIES

Now in paperback...

Henry VI and the Politics of Kingship

John Watts

"Watts' book offers a great deal, not least in terms of his clarification of the values, norms, and expectations of politics in late medieval England..."

— Albion

Henry VI (1422–61) was one of the most spectacularly inadequate kings of England, and his reign dissolved into the conflict known as the Wars of the Roses. Yet he held on to his throne for thirty-nine years and, for almost thirty of them, without much difficulty. What was the nature of Henry's inadequacy, and why did it have such ambivalent and complicated results? This book looks intensively at the political system itself, rather than at individuals, their personalities and patronage networks, and thus offers the first truly structured narrative of the reign.

Gillray Observed

The Earliest Accounts of his Caricatures in *London und Paris*

Christiane Banerji and Diana Donald, Editors

James Gillray, one of England's best loved caricaturists, was an immensely successful and popular artist, yet there were no accounts of his work published in England during his lifetime. The single contemporary source on Gillray is a series of commentaries published in the German journal *London und Paris* between 1798 and 1806. Christiane Banerji and Diana Donald have now translated and edited selected commentaries, with accompanying illustrations. The edition offers a unique insight into the role of satire in British politics during the Napoleonic era.

Transition of Power

Britain's Loss of Global Preeminence to the United States, 1930–1945

B.J.C. McKercher

This book addresses one of the least understood issues in modern international history: how, between 1930 and 1945, Britain lost its global preeminence to the United States. The crucial years are 1930 to 1940, for which until now no comprehensive examination of Anglo-American relations exists. *Transition of Power* analyzes these relations in the pivotal decade, with an epilogue that deals with the Second World War after 1941. Britain and the United States, and their intertwined fates, were fundamental to the course of international history in these years.

British Identities before Nationalism

Ethnicity and Nationhood in the Atlantic World, 1600–1800

Colin Kidd

This book examines the status and uses of ethnicity in political debate during the seventeenth and eighteenth centuries. Ranging widely across the political cultures of England, Scotland, Ireland and revolutionary America, it also considers European influences and comparisons as well as engaging historically with current debates over nationalism and identity.

Colonisation and Conquest in Medieval Ireland

The English in Louth, 1170–1330

Brendan Smith

The history of English rule in Ireland stretches back to the twelfth century. This book examines the actions of the earliest English settlers in Ireland and asks a number of questions about the society they developed there. This was also a time of English expansion in Wales and Scotland, and the book suggests comparisons and contrasts with the Irish experience in this broader setting.

Education and Economic Decline in Britain, 1870 to the 1990s

Michael Sanderson

For many years, British scientific and technical education has been regarded as inadequate and poor in comparison to competing countries. The deficiencies of the British education system and its failure to support and promote vocational education and training to create "human capital" in the labor force have been seen as a large factor in Britain's economic decline since the 1870s. Michael Sanderson examines education's supposed part—or not—in this decline and focuses on those issues where education has been seen to fail the needs of the economy.

W. R. Ward, Emeritus

This book offers a brief, but comprehensive, account of religious belief and experience in Europe between the Westphalia settlements in 1648 and the French Revolution. The book is organized around large European regions such as Central and Northwestern Europe (including Britain), Southern Europe and North and Eastern Europe. Within each chapter Professor Ward discusses the churches in their political, social and intellectual context. With its maps, glossary and guide to further reading, this promises to be a major aid to students of Christianity under the *ancien régime*.

The Intellectual Foundations of the English Benedictine Reform

Mechthild Gretsch

This book explores the foundations of the intellectual renaissance in late-tenth-century England, including both the English Benedictine reform and the establishment by Æthelwold, Bishop of Winchester, of his influential school. The early stages of Æthelwold's scholarly career are explored and new light is shed on the role which King Æthelstan's cosmopolitan court played. Two widely influential Old English texts are definitively attributed to Æthelwold and his circle, which attest to the importance that the reformers attached to the vernacular.

Women's Reading in Britain, 1750–1835

A Dangerous Recreation

Jacqueline Pearson

The growth of female reading audiences from the mid-eighteenth century to the early Victorian era represents both a vital episode in women's history and a highly significant factor in shaping the literary production of the period. This book offers the first broad overview and detailed analysis of this growing readership, its representation in literature, and its influence. Jacqueline Pearson examines both historical women readers, including Laetitia Pilkington, Elizabeth Carter, Frances Burney and Jane Austen, and a wide range of texts in which the figure of the woman reader is important.

Critical Inquiry

Critical Inquiry

For a quarter century, *Critical Inquiry* has served as a haven (though not always a safe haven) for the development of new critical thought. *Critical Inquiry* is a place where new ideas about criticism and culture — literature, art, architecture, film, history, philosophy, music, science — are defined and debated. Devoted to publishing the best critical thought in the arts and humanities, *Critical Inquiry* combines a commitment to outstanding scholarship with a concern for dynamic dialogue.

Where new ideas are forged . . .

Today, *Critical Inquiry* is informing a new generation of readers who want to be challenged with fresh approaches from a wide range of disciplines. In *Critical Inquiry*, literary scholars read about Josephine Baker and African American dance, philosophers find themselves reading about *Toy Story*, and film scholars are reading about Andy Warhol's philosophy — all within a single issue. Sometimes our contributors surprise their readers, but in the pages of *Critical Inquiry*, readers may surprise themselves as well.

Sometimes sparks will fly

And then, there are the highly charged exchanges between contributors and their critics. Sometimes fierce, occasionally friendly, always exciting. *Critical Inquiry* will engage, enlighten, maybe even enrage you. But it will never fail to let you see culture and criticism in new and extraordinary ways.
