

Building communities @ your library

These libraries have many community programs

by Jill McKinstry and Anne Garrison

A CRL President Betsy Wilson hosted a lively discussion at the ACRL President's Discussion Forum during the ALA Midwinter Meeting in Washington D.C. The forum highlighted three academic libraries that have shown leadership in partnering within their communities to build more enriching environments. The success of the featured partnerships demonstrated unlimited potential for librarians to show leadership in reaching out to groups beyond the campus borders. With vision and commitment, collaborative outreach programs can translate into concrete activities that are exciting, energizing, and, often unexpectedly rewarding to all.

Wilson believes that collaboration is critical to the success of libraries today. As community leaders turn to libraries for help in solving social problems, we are in a unique position to share the depth and breadth of our knowledge base and training.

Julie Todaro, dean of library services at Austin Community College and the creative energy behind the discussion forum, reminds us that the theme of information literacy is the basis for many of the current community partnerships, such as "service learning," "engaged learning," "K-16 efforts," and other cooperative outreach programs.

In celebrating these partnerships, this report will focus on three libraries' unique contributions to educating and building critical competencies for the 21st century. Trudi Bellardo Hahn, manager of User Education Services at the University of Maryland (UMd); Elizabeth Ader Henry, assistant director for Public Services, University of Missouri-Kansas City (UMKC) Libraries; and Isabel Espinal, Outreach Librarian, University of Massachusetts, Amherst (UMass) summarized the programs at their institutions.

University of Maryland

Building on a campus initiative for community outreach, User Education Services took advantage of an idea for collaboration that was born out of a request to bring young people into the university library. The goal was to plant the idea in young students from Prince Georges County that attending a university might be possible (http://www.lib.umd.edu/UMCP/UES/community_outreach.html and <http://www.lib.umd.edu/UMCP/UES/visitors.html>). Umd hosts the following programs:

- **America Reads** (<http://www.lib.umd.edu/UMCP/americanreads.html>). More than 100 six and seven year olds visit the library in groups of 15 to 30. These students, tu-

About the authors

Jill McKinstry is head of the Odegaard Undergraduate Library at the University of Washington Libraries and chair of the 2001 ACRL President's Program Committee, e-mail: jillmck@u.washington.edu; Anne Garrison is humanities librarian at Swarthmore College, e-mail: agarris1@swarthmore.edu

The benefits of collaborative partnerships are: good public relations; increased visibility and connections on campus; enhanced library staff morale; greater opportunity to contribute to your community; and better recruitment for the university.

tored throughout the year by campus undergraduates, come to the library for a one-on-one, one-to-two hour session with a librarian. During their visits they are read to by librarians, treated to performances by library assistant/library school students, and receive a free paperback book (donated by a local company).

• **Solving a World Problem.** The university library annually hosts 100 middle schoolers from a local communications magnet school. Each child gets an annual assignment to do research and then write a paper that will “solve a world problem.” One step in the process is that they spend an entire day, 50 at a time, participating in an elaborate instruction program put on by university librarians.

• **School library media specialists.** UMD is a partner in an IMLS grant with the Maryland State Department of Education, UMD College of Information Studies, UMD College of Education, and Prince Georges County Public Schools to establish a program to encourage library school students to become school library media specialists. The libraries’ role is to provide training in information resources for the students who are involved in the program, as well as for teachers in the schools where the students are placed for an internship experience.

• **Northwestern High School.** UMD has a long-standing relationship with Northwestern High School in College Park, Maryland, and the libraries now participate in a program to encourage at-risk Hispanic students to think about going into college prep courses. This year the students read the book *When I Was Puerto Rican* by Esmeralda Santiago, then went to the library and learned

to conduct research on the author and on Puerto Ricans in the United States (<http://www.lib.umd.edu/UMCP/MCK/nwhs.html> and <http://www.lib.umd.edu/UMCP/MCK/nwhs2.html>).

The benefits of collaborative partnerships are: good public relations; increased visibility and connections on campus; enhanced library staff morale; greater opportunity to contribute to your community; and better recruitment for the university.

Tips before you leap

- Think long term.
- Don’t raise expectations that you are not willing to continue to fulfill.
- Build close personal relationships with key people.
- Gather evaluation data and testimonials from participants and share them with all partners.
- Do a process analysis after each event.

University of Missouri–Kansas City

Collaborative partnerships at UMKC, an urban campus of students 27 to 28 years old on average, have been in effect from 1 to 35 years. They have engendered high visibility, increased credibility, and good will in the broader community. They serve as building blocks for further outreach activities and bring priceless benefits, including new endowments and excitement for all participants. UMKC’s have collaborations with the following:

• **University Academy School.** UMKC works closely with this charter school. These junior high/high school faculty members are given adjunct faculty status and therefore have access to library resources, including circulation, electronic databases and an online catalog, and library instruction for themselves and their students. Currently there are 218 students in grades 7, 8, and 9 in a student-centered environment that focuses on critical thinking, cultural diversity, and leadership.

• **Hickman Mills School District Management School.** UMKC works with this school to provide access to library resources for students and faculty, including circulation, electronic databases and an online catalog, and library instruction. The management school serves all grades (K–12) and is for students who, because of behavior difficulties, have been permanently expelled from Missouri public schools, which means they are

denied enrollment in any Missouri school by virtue of the Missouri Safe Schools Act.

- **UMKC High School College Program.** UMKC works with local high schools to provide library instruction particularly for those students enrolled in the UMKC High School College Program. The high school program offers 619 classes for college credit throughout the greater metropolitan area and the western corridor of Missouri in 55 high schools. The library supports this program by providing full access to the resources and services of the library for these 7,000 students and 225 adjunct faculty.

- UMKC works with the **Truman Presidential Library**, the **UMKC History Department**, and **local high school history teachers and students** to facilitate access to 2 million pages of presidential documents and 1,500 books relating to the presidency that were transferred from the Harry S. Truman Library and Museum to UMKC's Miller Nichols Library.

To celebrate the establishment of the collection, the Truman Library and UMKC hosted an event on February 25, 2000, at the Miller Nichols Library. Students from Paseo High School, the Barstow School, and UMKC engaged in a research workshop using materials in the collection. The workshop illustrated the unique and challenging character of original historical documents, and helped students analyze the information from the collection to make their own judgments about past events.

Miller Nichols Library faculty continue to partner with UMKC faculty in the History Department and local high schools in using this collection. Library faculty and staff, for example, have created a complimentary Web site featuring recordings of presidential speeches from the library's special sound recording collections (<http://www.umkc.edu/lib/spec-col/Truman/PresSpeeches/presspeches.htm>).

University of Massachusetts, Amherst

UMass has an extraordinary number of partnerships as well as a wonderful Web presence, setting the context of these services into their strategic plan and explaining specific services for the business community.

In 1997, with the new director, there was a new planning process instituted, including outreach, diversity and multiculturalism, and

a focus on library as place. An outreach working group was formed and in 1998 the libraries' administration created new positions—outreach specialist and communications specialist—and established a Library Outreach Committee. A plan was released in August 2000, highlighting many outreach activities that are not new, but providing a new emphasis on the packaging and communication to others on campus (<http://www.umass.edu/outreach/>).

- **UMass Amherst Libraries Off-Campus Outreach Situation and Plan, August 2000** (http://www.umass.edu/outreach_or_libraries_stratplan_00.htm).

- **UMass Amherst Libraries Planning for Outreach** (<http://www.library.umass.edu/plan/>).

- **Business Resources at the W.E.B. Du Bois Library for Massachusetts Residents and Organizations**, including recent Business Outreach Events (<http://www.library.umass.edu/subject/business/community.html>).

- **MassBedrock: Massachusetts Business and Economic Development Reference Online Center for Knowledge**, a digital library designed to offer multiple access points to selected business data and service referrals (<http://www.massbedrock.org>).

- **Multicultural outreach and events as a way to build community**, including Hispamérica conference and Latino Heritage Month (<http://www.library.umass.edu/latino/>) and the Multilingual Poetry Fest 2000, using a LSTA grant from Massachusetts Board of Library Commissioners (<http://www.library.umass.edu/events/poetry/>). UMass Libraries also sponsors the ALANA (African, Latino, Asian, and Native American) Library Career Dinner, building community by inviting students of color to enter the professional community of librarians. A welcoming, academic library environment is an ideal place for recruitment.

The staff reactions to these partnerships are positive and many staff librarians and non-librarians participate on a volunteer basis. For some projects, new staff have been added based on project funding. But what continues to be a challenge is how to best integrate partnerships into existing work.

A very important benefit has also been the opportunity to learn about our communities, their needs and their wants.

Quarterly

Bimonthly-copublish

Quarterly

The AIChE Package Plan 2001 is the most cost-effective and convenient way to a complete chemical engineering collection. With just one order, you automatically receive more than 10,000 fully indexed pages, containing the year's most important research findings, news of current or pending government regulations, and industrial case histories written by practicing engineers.

The Package includes:

- 5 of the process industries' best periodicals
- 1 serials volume covering safety in ammonia plants
- 1 annual directory of Chemical Engineering Faculty
- 1 industry-ready book of Equipment Testing Procedures

No gaps, reprints or duplicate coverage.

Please visit us at the ACRL Conference Exhibition at Booth #341

© 2000 American Institute of Chemical Engineers

Just reliable chemical engineering information.

All for just \$2,075*— a savings of more than \$500 off the regular list price.

For more information on the AIChE Package Plan 2001, call Dolly King at 212/591-7662, or visit us on the Web at www.aiche.org

Be sure to ask about the online editions of our periodicals and, how, as a Package Plan Subscriber, you can save money on print/Web combinations.

RARELY SEEN BEFORE

Latin American History and Culture: An Archival Record

From Primary Source Microfilm, *Latin American History and Culture* assembles sources never before accessible that will allow researchers to gain new and unique insights on all of the Americas, from pre-colonial to post-colonial periods.

Series I: The Yale University Collection of Latin American Manuscripts, Part I contains original and copied manuscripts from Mexico, Peru and other areas of Latin America, and covers their histories from the 16th through early 20th centuries. Those who have used this collection consider it one of the best in the world.

Series II: Cuban History and Literature, Part I: Serials and Printed Materials from Harvard University presents rare printed materials that offer fascinating perspectives on Cuba's racial and ethnic heterogeneity from the early 19th century through the 1930s. Filmed from the archives of Harvard College Library, the publications found in this collection — most of which have never been accessible until now — provide insight into family life, gender relations, entertainment and more.

INFORMATION INTEGRITY

Primary Source Microfilm

GALE GROUP
A THOMSON COMPANY

tomation at the University of Ghent in Belgium, delivered the closing plenary address on the Open Archives Metadata Harvesting (OAMH) protocol and implications for scholarly communication. His presentation can be found on the CNI Web site at www.cni.org.

Van de Sompel described the OAMH protocol as "a low-barrier interoperability specification for the recurrent exchange of metadata between systems." The OAMH protocol allows for federated services such as SDI, alerting, and linking services; database synchronization; and harvesting the deep Web. The OAMH protocol advances the interoperability of electronic preprints as a means to promote their global acceptance as a "decomposed" scholarly communication system.

Van de Sompel posited that in the current scholarly communication system, it is increasingly difficult for libraries to fulfill their fundamental role of safeguarding equality of access to scholarly information. He encouraged librarians

to rethink themselves and to become proactive in exploring alternatives for scholarly communications, like the OAI (see <http://www.openarchives.org/>).

Concluding that there are new opportunities for shaping a sustainable scholarly communication system, van de Sompel outlined the advantages libraries bring to the mix. Libraries are close to authors; are in a good position to archive institutional materials; are quick to embrace new technologies; have very knowledgeable people; provide a level of redundancy in services that is no longer required in a digital environment; and safeguard equity of access through global representation.

Van de Sompel warned that libraries as organizations are slow moving, hosted by slowly moving institutions; that libraries are slow to recognize that a new technology may allow for new modes of operating; and that the information world runs on Internet time.—*Betsy Wilson* ■
