

College and University Library Statistics, 1956-57

FOLLOWING THE ALA reorganization, and effective April, 1957, the functions of the ACRL Statistics Committee were transferred to the Library Administration Division. The former ACRL Committee agreed to serve through the San Francisco Conference and to report to the new Division in order to insure the continuity of the publication of these very useful library statistics. It is anticipated that future compilations of college and university library statistics will appear in *College and Research Libraries*.

There were few minor changes made to the questionnaire this year, primarily because the future of this Committee's assignment is uncertain. Many worthwhile revisions to the reporting form could be made and a new committee will obviously have new ideas.

It should be emphasized that the "Per Student Operating Expenditure" figure is based only on the total of graduate and undergraduate students. The inclusion of the extension student figure is for the use of those librarians who may need this information to interpret properly the demand made on their library budgets.

Each year fewer libraries return the questionnaire by the Committee's deadline of October 1. Although second requests were mailed to 150 institutions, and the deadline was extended to October 20, this year's compilation reflects an increase of only four libraries over last year (413 vs. 409—excluding junior colleges). This does not imply that the same 409 libraries included last year are represented. Lack of consistency in reporting by the same institutions has been one of the Committee's greatest problems.

Mr. Bentz, Chairman of the Statistics Committee for College and University Libraries, LAD Section on Library Organization and Management, is Associate Director, State University of Iowa Libraries.

Division of the libraries by groups always creates another problem. This year, as previously, Group I includes all state universities, plus other institutions which grant a significant number of doctors' degrees. The division between Groups II and III is a budgetary one, with libraries having a total operating budget of \$35,000 or more being placed in Group II. Even the teachers colleges cannot be categorized easily because many of these institutions have dropped the word "Teachers" from their official names and now offer a curriculum which does not relate solely to teacher education. Perhaps all institutions should be arranged alphabetically according to the official name of the school typed on the questionnaire.

As in recent years, the statistics were compiled by members of the Committee whose names are listed below with a summary statement prepared by each. The preparation of these annual data is an arduous task and the Association appreciates the voluntary efforts of these compilers.

Group I: Compiled by James Ranz
DIRECTOR OF LIBRARIES
UNIVERSITY OF WYOMING

One hundred and twenty-six questionnaires were mailed to Group I libraries this year and 112 were returned in varying degrees of completeness. All have been included in the published tables.

On the basis of returns for the 84 libraries that have submitted complete financial figures for both the 1955/56 and 1956/57 fiscal years, it would appear that, again, both library and total institutional expenditures are higher. During the past year library expenditures increased by 9.5 per cent, and educational and general institutional expenditures, by 8.5 per cent. This is in contrast to the preceding year when educational and general institutional expenditures in-

creased 10 per cent while library expenditures increased only 7.5 per cent.

The median minimum salary paid by the reporting institutions to "All Other Professional Assistants" is \$4,000 for the year beginning September 1, 1957. One year ago this same figure, which in most instances approximates the beginning professional wage, was \$3,586. The average salary for all professional librarians is \$5,196, compared to the figure of \$4,741 a year ago. (Figures result from multiplying the average of the median minimum and median maximum salaries for each category by the number of librarians within that category, adding the products thus secured for all categories, and dividing this sum by the total number of librarians in all categories.)

Group II: Compiled by H. A. Brubaker
LIBRARIAN, LAWRENCE COLLEGE
APPLETON, WISCONSIN

Of the 105 questionnaires received, 104 are included in the final tabulation. The median figures indicate a steady rise in operating expenditures. Salaries continue to improve in almost all categories. The median minimum salary paid "All Other Professional Assistants" increased from \$3,600 for 1955/56 to \$3,804 for 1956/57. While libraries seem to be holding their own in expenditures per student, they are losing ground in the percentage of the total educational and general institutional funds allocated to the library.

Group III: Compiled by Clarence Gorchels
WASHINGTON STATE COLLEGE LIBRARY
PULLMAN, WASHINGTON

Questionnaires were returned by 110 libraries in Group III, and only one was received too late to be tabulated. Last year 113 libraries reported. Always of primary interest in these statistics are the reported budgets, and this year's figures reflect a continued increase. The median figures for such expenditures as salaries, student services, book purchases, binding, etc., are rather consistently increased over last year's. At the same time, however, these reports present evidence that the ratio of library expenditures to the total expenditures in colleges is decreasing. Because of the many variables in

small colleges and their libraries, good judgment should be used in the interpretation of these statistics.

Teachers Colleges: Compiled by
Robert R. Hertel
LIBRARIAN, STATE UNIVERSITY TEACHERS
COLLEGE, CORTLAND, NEW YORK

The typical teachers college library, according to the median figures for the 88 libraries reporting, would be serving an undergraduate enrollment of more than 1,100 students, and would provide library materials for 107 graduate students and for an extension program of 330 in-service teachers. Approximately 50,000 books, 13 newspapers and 358 magazines would be available to these clients. Less than \$10,000 would be spent for books and other materials, while \$976 binding money would presumably keep the collections from physically deteriorating. Roughly, three-quarters of the \$42,786 total budget would be spent on staff salaries and student help. An operating expenditure of \$31.52 would be spent on each student served, an increase of \$2.00 over last year's median. The median library's operation would represent 4.8 per cent of the total institutional expenditure.

Five and one-half full-time employees would be operating the median library, and each librarian would be working 43 out of 52 weeks of the year. Two clerical workers and student assistance which totalled 4,320 hours would relieve the librarians of non-professional tasks. The beginning professional librarian would be employed at a yearly salary of \$4,380, while the head librarian would be receiving an annual stipend of \$6,780. Assistant librarians and department heads would be paid between \$5,232 and \$6,210, while positions of intermediate responsibility would be paid between \$4,506 and \$5,365. The campus school librarian's salary would average about \$5,400. Clerical personnel would receive salaries ranging from \$2,832 to \$3,634.

A comparison with last year's median figures would show a larger student body being served with slight increases in annual acquisitions, amount spent on salaries, total operating budget and per student expenditures. All staff salaries would show about a \$500 increase over last year's median figures.

**Junior Colleges: Compiled by
Ruth E. Scarborough**

**LIBRARIAN, CENTENARY COLLEGE FOR WOMEN
HACKETTSTOWN, NEW JERSEY**

Of the 611 questionnaires mailed to junior college libraries on August 8, 1957 193 were returned in time to be included in the statistics compilation. More than a dozen were received too late for publication. The questionnaires were addressed to the librarian when the librarian's name was known. The membership list of the Junior College Libraries Section, ACRL, the American Association of Junior Colleges' *Junior College Directory*, 1957, and the American Council on Education's *American Junior Colleges*, 1956, were used to compile the mailing list of the 611 junior colleges. Returns began arriving within a week. Forty-six more ques-

tionnaires were received than last year.

In comparing this year's statistics with last year's, there is very little difference in the high and median figures, although these figures show a slight decrease in eleven columns of the high figure and in fourteen columns of the median figure. The lower figures may be caused by the fact that more of the smaller colleges with part-time librarians and low budgets reported this year, and that there were also two or three new colleges with small student bodies, small book and periodical collections, etc.

Of the 147 colleges which reported last year, 95 of these reported again this year. There are approximately 115 public and 75 private junior colleges reporting this year. In examining some of the figures for colleges reporting both years, the general trend is an increase rather than a decrease.

1. Central library and all agencies. 2. Resident and special students (no student counted twice). 3. Includes supplies, transportation, and all other non-capital expenditures not specifically reported. 4. In computing this figure, off-campus extension students have been omitted. 5. Includes expenditures for administration, resident instruction, organized research, extension, libraries, plant operation and maintenance, etc., but excludes capital costs and expenditures for auxiliary enterprises such as dormitories, cafeterias, etc. 6. Not reported or not available. 7. Includes serials. 8. Includes entire Northern Division, University of California. 9. Includes off-campus binding only. 10. Excludes Denison M. D. Memorial Library. 11. Includes classified Government Documents collection. 12. Includes 1,325 students from affiliated institutions served primarily by separate library facilities but using the Columbia University Libraries also. 13. Includes 7,047 students from affiliated institutions served primarily by separate library facilities but using the Columbia University Libraries also. 14. Estimate. 15. Included in Staff salaries. 16. Includes heat, light, water and repairs. 17. Net additions. 18. Excludes T. C. Elementary and High School, Hilo Branch, Legislative Reference Bureau, and Industrial Relations libraries. 19. Excludes Medical Center Library. 20. Excludes Maryland State College Library. 21. Excludes administrative costs on over \$55,-

000,000 government and industrial research contracts. 22. Includes University Library, Law Library, Clements Library, Flint Library, Michigan Historical Collections, and Business Administration Library. 23. Includes University Library, Law Library, Clements Library, Michigan Historical Collections, and Business Administration Library. 24. Includes University Library only. 25. Excludes libraries of the Schools of Law and Medicine. 26. Excludes School of Mines and Metallurgy Library. 27. Includes Division of Health Affairs Library except for expenditures. 28. Excludes 10,944 part-time students in the Evening Division, Chicago Campus. 29. Excludes Medical School and hospitals. 30. Adjusted figure. 31. Includes McKissick, Education, Law, Caroliniana, and Extension libraries. 32. Excludes Branch College Libraries. 33. Excludes Law and Medical Center Libraries. 34. Excludes Wisconsin State Historical Society Library. Includes, for the first time, the University of Wisconsin in Milwaukee, formerly separately administered and separately reported. 35. Includes Law Library for the first time. 36. Excludes "Other Operating Expenditures." 37. Includes dormitory costs. 38. Excludes 7,562 part-time Evening College students. 39. Corporate colleges, formerly reported, have been excluded. 40. Number of libraries on which high, median, and low are based. 41. Excludes 4,577 students registered in evening session.
