

## **Annals of Psychophysiology Volume 12 June 2025**

### **About the Annals of Psychophysiology**

The Annals of Psychophysiology (APP) is the semi-annual journal of The Behavioral Medicine Research and Training Foundation - which provides all funding to support the journal. Issues are usually published in June and December. The journal is published in cooperation with Pakistan's Advance Educational Institute and Research Center (AEIRC) which published the journal from its inception in 2014 until 2024 and continues to provide technical support for preparing manuscripts for publication.

The APP provides a platform for scientific contributions on all aspects of psychophysiology with emphasis on the psychophysiology of health and disease with sub-themes covering environmental and sports psychophysiology. Articles include current reviews of various aspects of the field, original research, and editorials. The Online ISSN is 2412-3188 while the Print ISSN is 2410-1354.

APP is an open-access journal committed to maintaining high standards through rigorous peer review. The journal does not charge authors any fees for publication. Information about the Foundation and the courses it offers centering on behavioral medicine and biofeedback can be found by following this link: <https://www.behavmedfoundation.org>

The journal is actively soliciting original research and reviews of current research in psychophysiology.

Please go to our website <https://annalsofpsychophysiology.org> for lots of information about the journal, its policies, and [instructions for submitting manuscripts](#).

**Please take a few moments to look at the Foundation's courses!**

**The Behavioral Medicine R&T Foundation supports this journal by selling courses to clinicians, coaches, educators, military, and lots of others who are interested in optimal functioning and behavioral medicine.**
