Abstract: This in the article small business and private entrepreneurship develop directions , small business national in the economy place and importance economic indicators through lit. Small business and private entrepreneurship market to the environment fast adapt to get , to get busy to provide , income formation and this through his/her inequality soften and middle owners layer decision in the delivery advantages open given .

Key words : small business , property , investment , unemployment , incentives , competition .

Small business and private entrepreneurship market to the environment fast adapt to get , to get busy to provide , income formation and this through his/her inequality soften and middle owners layer decision in the delivery advantages with together private and personal the property to come true in the release farm of conduct the most effective from the forms is considered .

Entrepreneurship of activity freedom , private property indifference in practice provision from this state since then in politics priority direction become remains .

Small business market in the economy farm to conduct shape as any form of ownership shape denial Small business proprietary to the description according to complicated farm to conduct shape considered , ownership there is all to the forms mainly organization done , activity to conduct possible . Market in the economy developed countries experience various property to the forms based small business from subjects only private owned so enterprises activity somewhat effective that shows .

Exactly this due to , in 2017–2025 Uzbekistan Republic development five priority directions according to actions in the strategy small business and private entrepreneurship development to encourage aimed at institutional and structural reforms continue to hold priority direction as is considered . Private entrepreneurship small from business difference financial funds and economic resources formation (of the entrepreneur) own property , inheritance left , debt or for rent taken property and others) strictly private to the property is based on and farm in the conduct personal initiative priority place occupies .

In our republic economic development current in the phase small business further to develop encouragement with together , its in the composition private to the property based subjects share non-stop increasing to go separately attention Our reforms are being focused on . as a result past 93 thousand per year or for 2018 relatively almost 2 times many new entrepreneurship subjects organization World " Business" of the bank 7th place in the ranking of " conduct " rise and business to list to take indicator according to 190 countries of the world 8th place among we occupied and the most good reformer countries We took a seat in the queue.

In our country small business and private entrepreneurship of the field in the economy , those who are employed share in 2018 compared to 2010 from 74.3% to 78.2 % of GDP what in formation The share of industry increased from 52.5% to 59.4% . products working in the output so indicator from 18.8% to 34.7% increased . During this period small business subjects number increased by 1.3 times , their in export share 2 times close increased .

In the regions of the republic small business gross territorial product, networks product, main to capital placed investments, retail goods turnover and service show size and other macroeconomic indicators also large in share positive change event gave and some There are also imbalances. In particular, the republic's almost all territorial in subjects small business and private entrepreneurship gross territorial in the product share for 2010 compared to 2018 various kind at the level increased if so, in some this indicator one a little decreased. Its the most high growth of 11.3% (Andijan vil.), the most many decrease and 8.7% (Syr Darya vil.) did.

For 2018 come small business and private entrepreneurship GRP in the most high share Jizzakh and Namangan (80.9%) and lowest weight Navoi (37.6%) region relevant was.

In 2010–2018 small business GDP in weight per year by an average of 0.4% increased if, industry in the product and his/her The share increased from 19.6% in 2010 to 45.0% in 2016 and to 19.6% in 2018. come and 34.7 percent organization reached or for 2016 10.3% decrease compared to observed. Construction in the field small business The share was 52.3% in 2010, 67.2% in 2016, and 66.6% in 2018. organization reached if, services in the field and suitable years 36.6%; 60.5% and 55.2% respectively organization is doing.

First times for entrepreneurs internal at the market sold product according to added value tax one part return order current is being done. So far this order only product export when done applicable It was. at the expense of entrepreneurs 3.4 trillion soums at its disposal or past per year 2.5 times more than many funds remain.

For example, in our country small business and private entrepreneurship develop via:

- medium owners class is formed;
- macroeconomic instability, economic problems such as unemployment and shortages problems end finds;
- healthy competition environment creation through GDP quantity and quality in terms of growth observed;
- internal market necessary with goods (services) is saturated and their quality increases;
- and ultimately population marriage level to grow is achieved.

Small business and private entrepreneurship develop not only state and public in development, perhaps stream one human rising going vital needs in satisfaction important importance has, that is service display, retail trade, food products working release such as in the fields this activity obvious manifestation will be.

Same at the time small business and private entrepreneurship intense growth provision, private the property protection to do, entrepreneurship develop on the way some administrative obstacles eliminate to be in our republic investment and business environment quality in terms of new to the stage lift through international to the standards complete answer to give in providing own on the contrary finds.
