Annotation. This article discusses man's formation as a person, on the use of individual oriented technologies in the educational process. Individ, individual, the concepts of individual individually have also been revealed to the person to be manifested as a certain image.

The development of the person in higher education in higher education, the development of the person in higher education in higher education and the reforms of the person in higher education in higher education reforms in higher education reforms, will help young people find the main content in higher education and the youthful workshop, and they will have great opportunities for them to find their place as a person. The President of the Republic of Uzbekistan Shavkat Mirziyoyev said: "What kind of human being of the planet is associated with our children. Our main task is to create the necessary conditions for young people demonstrate their potential."The person-it is the dynamic, coordinated integrity of the intellectual moral and voluntary features of its consciousness and individual's individual abilities and individually. The person is this general social and moral, special class, unit of the national and individual. In special historical cases, personality acts like integrity by the social system. The person is a different topics of the person as a social phenomenon and various social contacts. The social qualities of personalities are manifested in His actions and in his relationship. According to these efforts, at the inner world of the person can be assessed the spiritual and moral qualities of the positive and negative qualities. Individual means the word "individually", "separate", "uniform", "uniform". The action in the formation of the person is a unique factor. The infant (baby) also performs various actions. However, these efforts are later reflexes, but consciously, but also in the form of an response to unconditional and conditional pathogiar.The concept of "Individual" completely fills the concept of "man" in general, contains the signs and characteristics of it from other people, on the other hand, and the common and characteristic features typical of similarities. This means that Individual is a scientific category confirming the fact of human involvement.The person is called an individual. We bring all people to the new people who are new people, the minds of mental retarding. Man: We can call man, who can be human, or whether it is disabled or a newborn baby, or a woman and a woman. There are some differences between a person and human beings during our article.The man's appearance, can be similar to anyone else with his height, but there will be no same people in terms of the verb, client and features as a personality. Even in the twins developed in a single egg, scientists have noted similarities in many ways, and some differences are identified in correlation on their personal qualities. The

person is not returned, he is unique by his qualities and existence. It is a set of its Individual psychological properties based on non-repair and unoccupation.

Because a talented person first benefits the society, in which he himself does, and every man himself did. The problem of abilities is primarily related to the issue of human intelligence, the presence of qualification, skills and knowledge in it. Especially because the intellectual potential of every age in the desire to hold a profession, the concept of more ability in psychology is studied in psychology to be associated with the intellect of intelligence.

Enough and each of us a set of qualities of each of us to set ourselves a goal and overcoming the difficulties for us. Emotions and motivation are what is happening around us, we have the adjectives that illustrate our emotional relationships, which express us spiritually, are reflected in the same situations in our current situations and in our minds. This means that individual qualities are an important subject in which an integral part of our conscious lives, the memory, our memory and thoughts. Because they are directly related to our individual style in implementing various activities and doing things.

Abilities - such individual, stable qualities in the person, they explain the reasons for human exercises, achievements, and difficulties.

Temperament is a set of properties that explains the reaction of things, incidents, situations, and humans in different situations. The character contains the qualities that make a person who are individuals and groups of individuals and people, self-suffrage, situations, things, and events. It should be noted that our training based on wonderful personal qualities, the formation and development of the world is distinguished by its inclination contributor. Today, the world of world civilization is recognizing the teachings of Abu Ali ibn Sino, A. Jeruni, Al-Khwariz, A. Chajduvan, B. Navshbadi, A. Navojani, Z. European Genior Pedagogues have contributed to the development of pedagogical sciences, including: French Frankre Di Feltre, English Thomas More, Russian K.d.ushinsky and others. These were in favor of humanistic upbringing, development of independent thinking, creativity, activity, exhibition materials, and labor education. They considered students the subjects in the pedagogical process. Students also play the leading properties of individual characteristics in the process of learning.
