**Abstract:**In this article, the teacher's professional skills and purpose, task of competence, preschool educational institution educator's competence, educator's pedagogical skills, the image of a modern teacher, the teacher is creative in his pedagogical activity approach, organization of classes in preschool educational institutions ways, the educator's innovative activity, the preschool education system technologyization, preschool education in developed countries includes the peculiarities of the system.

**Key words:** educator, young generation, ability, national value, belief, competence, educator competence.

In our country, a child's gender, language, age, race, nationality, faith, attitude to religion, social origin, type of service of parents, Pre-school education regardless of social status and place of residence is guaranteed. Educator, making our young generation worthy children of our people along with the important and proud work of training, he performs a responsible task.

The political maturity of the educator is important for the quality of raising children to realize one's responsibility before the society, creative tasks of education to approach, to constantly improve one's skills and at work helps his comrades to grow. So, first of all, the educator must be knowledgeable, to understand the laws of life, nature and society in which he lives, being socially active, general and preschool education pedagogy, children he must understand his psyche, physiology and age characteristics. Before school the quality of education is the issue that will decide our tomorrow. Educator's analysis of phenomena from a scientific point of view

approach determines the success of comprehensive development of the child.

Today, the leadership of our republic values the activities of educators is evaluating. Making the young generation a perfect person and leading them to perfection

For his achievements, educators are Methodist, senior Methodist educator and

are awarded with other similar titles. Fundamental reforms are being implemented in our republic today in kindergarten, academic lyceum and vocational college and higher education institutions norms and rules of positive behavior of the emerging generation, scientific thorough knowledge bases, professions, qualifications and skills demands to take over. For this, the growing young generation arming with knowledge, our national values, our spirituality absorption, world culture, with masterpieces of our national culture introducing them, raising them to be physically healthy and spiritually mature tasks were set.

Perform such a task of state importance of public education along with general education schools. Kindertartens with primary section play an important role. Of this

It is our state that every teacher can demand and control himself fulfill the requirements of preschool education institutions is a guarantee of increase. This includes:

1. Maintaining and strengthening the child's health.
2. Developing mental abilities.
3. Ideological and mental of our national value and spirituality

forming beliefs and views consistent with the principles.

4. Formation of love for Motherland, social activity.

5. A sense of camaraderie, friendship, honesty and diligence in the young generation content acquisition.

Therefore, the content of the above-mentioned qualities is increasing covering all aspects of the task of educating the next generation can't get But based on the educator's work, children can lead an independent life and more effective implementation of labor preparation work with a specific goal can be increased.

"Giving educators modern knowledge, their education faced with an urgent issue such as raising we are coming... first of all, in order for the teacher to give modern knowledge to our children, a coach should have this kind of knowledge."

From the points mentioned above, to the personality of today's educator it is necessary to understand how important the requirements are. So, the educator is a special pedagogical, psychological and specialist. He is considered a highly educated and virtuous person. A modern coach has in-depth knowledge of his specialty to be, he must work tirelessly on himself. Educator preschool education pedagogy and knowledge of the basics of psychology, physiology, age and psychological characteristics of children in the educational process must organize activities taking into account. Educator education being able to effectively use effective forms, methods and tools in the process should have the opportunity. Educator has a high level of pedagogical skills, etc to have communicative ability, pedagogical technique, speech, face, hand, leg and body movements, mime, gesture, pantomime) in depth should be mastered. A teacher can observe children, their behavior, correctly analyzing the causes of his behavior and the means that affect him should be able to use it. In the current period, the goals and tasks of educating a well-rounded, well-rounded person require the upbringing of social activity that embodies spiritual wealth, moral purity, and physical perfection. From this point of view, preschool education occupies an important place in the continuous education system. Preschool education - the laws of comprehensive education from birth to seven years of age, in the context of preschool education organization includes content, methods and forms of educational work organization. Every society is interested in raising a well-rounded person who feels responsible for his socio-economic and spiritual development. After all, the socio-economic responsibility of our society is given to every person to discover and realize the directions of his own abilities, to work effectively to the best of his ability in order to increase the welfare of the people. Solving these tasks assigned to society depends to a large extent on the professional skills of educators who make a great contribution to the training of future creators. Today, attention is being paid more than ever to preschool education, which is an important link in continuing education. It is well known that this stage of education is the foundation of subsequent stages of education. Uzbekistan is moving to a multi-level education system that corresponds to world standards. The educational technologies used in the educational process must teach a person to develop and work independently. It would be appropriate to study foreign experiences, adapt them to our current conditions, and use them in practice.
