Login . Education - knowledge to give , to qualify and skills harvest to do process , person to life and to work preparation main tool . Education in the process information is taken and upbringing done Education in the narrow sense teaching process not , but that family , working release and other in the fields information to give It also indicates the process of education . Education is the process of work , profession , etiquette to form , develop , its in society to live for need was to feelings has

to ensure that aimed at work - deeds set and this way with infused morality , character , virtue of the likes Value is reality . certain of events general human , social - moral , cultural - spiritual importance show for applicable concept . Human and humanity for significant was all things , freedom , peace , justice , social breadth , enlightenment , truth , goodness , beauty , material and spiritual riches tradition , custom and others .

National value - nation for important and serious importance has was aspect and feature

In Uzbekistan education and upbringing development national and universal to values is based on . Our homeland in culture universal values priority position occupies . Universal ideas and of values formation national of culture development features with related . In this regard Uzbekistan First President Islam Abduganievich Karimov As noted , "We own our progress other countries from the development separate we ca n't imagine and everyone something we do to ourselves related become " It won't stay ." In this place exactly universal to

values accent given . Because , universal values with national values mutual related will be and each other to fill , to enrich goes . Universal values human to cherish life love , duty , loyalty , ancestors respect , patriotism , justice , enlightenment , peace , harmony , friendship , cooperation like qualities expression will reach . Universal to values loyalty our youth right live , own instead to find , to go around reasonable in a relationship to be , to be born grown up his/her land holy that to know and of friendship to the value to reach teaches . National values and this nation , the people of this country by from history respectfully bride , person spirituality to enrich service to do are values . National in values hard work , historical to memory loyalty , belief respect , in treatment courtesy , modesty and thought important place holds .

Identity understanding history from knowing begins . This truth state policy to the level rise necessary . Society of progress basis , it inevitable from destruction saved remaining only power is enlightenment. Intellect intelligent , high spiritual people upbringing If only we could , before us put to goals reach we can , in our country prosperity and progress decision " finds " . Therefore , independence initial in the years in our country society development spiritual - moral

basics were determined , these are :

- universal to values loyalty ;
- our people spiritual legacy reinforcement and development ;
- human own opportunities free manifestation to do ; - patriotism .

Uzbekistan In the Republic National culture further develop Concept confirmation about Uzbekistan Republic The President's Resolution No. PQ-4038 of 28.11.2018 also values youth consciousness and to the heart to absorb methods about idea when notified this separately record to do first of all administrative road and violence to the method cautious empty demand This was done . methodological in the manual oriental traditions , customs , rituals , as well as their come exit history and educational in their work importance about word was conducted . As a result education upbringing to programs national values factors input works step by step to the conditions suitable without thorough done increased. Now and national of values modern education to the content absorption and integration of the process results scientific study , scientific of circles main from the topics to one is rotating . National of values historical-pedagogical aspects and his/her various edges study many researchers scientific research and scientific publications within done increased .

Current From 80 in the republic more than national culture centers working is standing . They Uzbekistan many national society political , economic - cultural spiritual in terms of again build in the process good role is playing . The people's unity , cohesion and tranquility about speaks we are , this is our priceless our wealth , says our president Sh.M.Mirziyoyev .

Elementary class to their students national value concepts in absorption start drinking class teachers to the following big importance give necessary is :

- 1) national values about to students concepts in giving teacher's enough knowledge , skill and to the qualification has to be ;
- 2) the teacher's himself/herself national values about to concepts has to be ;
- 3) every one the topic national to values tie to receive ;
- 4) to students national values about concepts hand to receive ;
- 5) education - upbringing in the process advanced pedagogical technologies hand to receive .

National value what that not knowing at all value when what in mind the eclipse unaware or values from within to our nation typical values separate unobtainable some elementary education teachers between us still exists and they our future to be to the youth education giving It is indeed sad that it is coming . Our state leader general education schools elementary in the symbols working teacher coaches about speaks Yes , sir. for information has non-existent , pedagogy colleges graduated secondary specialized education has was inexperienced teachers our future

to be to the youth education - upbringing giving from coming worried that it is said including , so says :, However , the child worldview , taste , potential formable elementary to classes the most mature , most experienced coaches attached to be put simple of logic himself / herself demand " will reach "

So , the teacher's himself/herself values known about one to concepts has to be Values known about one to concepts has was

only a teacher values to students about sufficient information , knowledge and skills , concepts give takes . In this regard Russian scientists - AA Koychuev , YE , A, Rezvan ; Uzbek from scientists - AA Bolibekov , DJ Kenjayev by take visited , national of values pedagogical aspects with religious moral of values commonality to the issue

dedicated scientific their research where is it to grow necessary . Scientific of values ideals in the form of expression dream - hopes to come true output with related

those people and society aspiring supreme from the purpose consists of It will be .

Start drinking . Class teachers are conducting subject - specific every one the topic values , especially national to values tie to receive lesson in the process one once even though it is a value , national our values, traditions to love them to preserve , to keep peace appreciation, peace , harmony to live , to each other kind-hearted to be such as topics according to forward pushed advanced thoughts '

students to the mind to convey to them education perfect in giving human as upbringing extremely important importance has . Vital experiments as a result come came out of thoughts conclusion so Represented by : National in our traditions far century-old experiences , homeland love , friendship , loyalty meanings Incarnate !

Conclusion in place this to say okay , Middle In Asia always national of values pedagogical aspects of them historical aspects like, in a generation to the generation inheritance postponement as a result , time with breathless improved and developed . National of values educational aspects and their in the content friendship , brotherhood , courage , patriotism and to the people was sincere loyalty motives glorified , parents with child's mutual love , dignity the most human good noble qualities hymn will be done .
