Abstract: The CPC has grown from a weak baby to a giant leading China to the forefront of the world. In the great era, only the theoretical system, the magnificent scientific theory and the great journey of the Chinese nation were produced. Through constant exploration and exploration, the Party and the people have developed a path of socialism with Chinese characteristics that is unique to China. Thought is the guide of action, and theory is the guide of practice. Theory should be used to guide practical action, analyze and explain practical problems. Therefore, scientific theory must be taken as the guide to take the road of socialist development with Chinese characteristics.

Keywords: Socialism with Chinese characteristics, Scientific theory, Socialism with Chinese Characteristics for a New Era.

1. Introduction

The scorching red sun rises; The spring breeze has arrived, and a hundred rivers become the sea. The white horse crosses the gap, the tiger roars and the dragon groans for a hundred years, and China's development is showing a magnificent scene of the tide rushing and the waves soaring. Brilliant future 100 years, looking forward to the sea of stars, look forward to sigh! The Chinese nation was devastated under the attack of the imperialist aggressors, there was a group of people who could not watch the land of Shenzhou fall into the hands of others, and it was at that time that the Communist Party of China was born, without a golden spoon, all the way to the War of Resistance Against Japan, the War of Liberation ... More than 100 years later, tens of millions of people turned over and became masters of their own affairs, opening a new era in Chinese history.

If I dip in the ink river and mountain, I will rely on the rice paper millstone, and in the next year I will write the mountains and rivers, paint a full moon with flowers, and give it to the majestic Kyushu. Spread out the simple yellowed picture scroll, and the fragrance of ink faintly hits. The landscape with only black and white colors seems to contain the feelings of all things, and the ink is concave, deep or shallow, and the meaning is endless. For a hundred years, the revolutionary martyrs went forward and fought bloody battles, shuttling between bullets and rulers with the pride of millet and rifles. Birth, ruler: death, love. More than a hundred years ago, the roar of the male lion shocked the world, awakened, awakened, revived the wind, in just a hundred years, the claws gradually sharpened, the mane gradually grew, and the majesty was overpowered. What kind of scarlet mysterious force makes China's male lion soar and proclaim its majesty? - It is the Communist Party of China. And what is it that allows such a team to overcome difficulties and lead the whole of China to rejuvenation? - It is the guidance of scientific theory.

In July 1921, a red boat slowly sailed out, several aspiring young people gathered in the red boat, and a new party was born, the Communist Party of China. The birth of the Communist Party of China came at a time of internal and external turmoil, which brought the dawn of war-torn China and laid the foundation for China's take-off. As the saying

goes, "Hardship and hardship, jade and ru are successful". The Chinese Communist Party knows this. Even in the face of the enemy in the abdomen, he never gave up the difficult situation, and through continuous theoretical exploration and profound practice, he achieved one big breakthrough after another.

After experiencing countless failures and lessons, suppression and resistance, confusion and exploration, the Communist Party of China has grown from a weak and immature baby to a giant leading China to the forefront of the world. In the great era, only the magnificent and unshakable theoretical system was produced, and the magnificent scientific theory and the great journey of the Chinese nation slowly unfolded. In the course of continuous exploration and exploration, the Party and the people have developed a path of socialism with Chinese characteristics that belongs to China alone. The history of the Party makes us never forget the bitter tears of the past, and it will also make us work harder to maintain the happiness of the present.

Under the guidance of the great theory and spirit of the Communist Party of China, China's economy and society have developed rapidly, people's rights have been increasingly guaranteed, the concept of Datong society is now gradually being realized, and targeted poverty alleviation is also being vigorously promoted... In this era of rapid development of science and technology, the trumpet of the times has sounded, freeze the beauty in the eyes, we should learn from history, strive to be the first, and add glory to the great country!

Thought is the precursor to action, theory is the guide to practice, and theory should be used to guide practical action, analyze and explain practical problems, and solve them. Summarize theory, learn theory, and master theory. All of them are for the application of theory, so the path of socialist development with Chinese characteristics must be guided by scientific theory. Scientific theories are the foundation of the great cause of party and state building. After the founding of New China, under the guidance of the Party's scientific theories, China was able to make great achievements in socialist revolution, construction and reform in practice, and at the same time, the Party also tested and enriched the unique scientific theoretical system of the Communist Party of China and suited to China's national conditions in continuous

practice in the more than 100 years after its founding.

2. Magnificent Achievements Through the Introduction of Mao Zedong Thought

At the beginning of the founding of the People's Republic of China, the Party and the State were troubled internally and externally. The first generation of the party's central leading collective, with Mao Zedong as the core, systematically summed up the experience of the period of the New Democratic Revolution and evaluated it in light of the national conditions at that time, and Mao Zedong Thought came into being. Through the guidance of Mao Zedong Thought, the Communist Party of China led the people, and finally realized the transition from the period of the New Democratic Revolution to the socialist revolution, allowing socialism to take root in the land of China. Let China completely free itself from the shackles of feudal society, sweep away thousands of years of darkness, and bring light to 40,000 compatriots. He embarked on the road of the great rejuvenation of the Chinese nation. Mao Zedong Thought is the first successful step in the Sinicization of Marxism, the precious spiritual wealth of the Communist Party of China, and points out the direction for building socialism in New China. The scientific guiding ideology is the crystallization of the wisdom of great people and an inexhaustible driving force for the CPC to lead the people forward.

3. Great Achievements Guided by Deng Xiaoping Theory.

Since the Third Plenary Session of the Eleventh Central Committee of the Communist Party of China, the second generation of the central leading collective, led by Deng Xiaoping, reviewed the practical and theoretical achievements and failed lessons since the founding of New China, summed up past experience, carried out scientific theoretical innovations, and made epoch-making historical decisions came into being, showing that China is still in the initial stage of socialism, and if we want to realize communism, we must not be too hasty, and then pointed out the direction for China's socialist construction - adhere to the road of socialism with Chinese characteristics, and created the immortal Deng Xiaoping Theory. Deng Xiaoping Theory is the product of combining the basic tenets of Marxism-Leninism with the reality of China in the new stage and the characteristics of the times, inheriting and developing Mao Zedong Thought, and guiding the continuous progress of China's socialist modernization with characteristics.

4. Great Achievements Have Been Made Under the Guidance of The Important Thinking of "Three Represents."

Since the Fourth Plenary Session of the 13th CPC Central Committee, the third-generation central leading collective, led by Jiang Zemin, has referred to the monumental works left by the first two great men, pooled the core of experience accumulated by the whole party over many years, and on the road of developing new China, has been actively forging ahead, actively summing up, daring to struggle, deepening understanding of socialism, clarifying a series of issues on

what kind of political party to build and how to build the party well, providing inexhaustible experience for subsequent development, and forming the immortal scientific theory of the important thinking of "three represents." It reflects the new requirements of the work of the party and the state on the development and changes in the contemporary world and China, is the leading banner for strengthening and improving party building, promoting the self-improvement and development of socialism with Chinese characteristics, and is the guiding ideology that the party must adhere to for a long time.

5. Great Achievements Made Under the Guidance of The Scientific Outlook on Development

After the reform and opening up, China's society has developed rapidly and made great achievements, and some contradictions and problems have immediately arisen. Industrial restructuring and ecological environmental protection are imminent, and SARS, an appalling and significant public health security incident, has revealed many problems that need to be solved urgently. Since the 16th CPC National Congress, the CPC Central Committee has collectively been led by Comrade Hu Jintao. In accordance with the new development requirements of the world and China in the 21st century, based on the actual national conditions at that time, on the basis of summing up China's past development practice and drawing on foreign development experience, adhere to the essence of people-oriented and deeply implement the scientific outlook on development. As the crystallization of the collective wisdom of the leadership of the third generation of the Party Central Committee, the Scientific Outlook on Development is an important guideline for China's economic and social development to achieve rapid development, and is a must be practiced on the road of building socialism with Chinese characteristics.

Even if Mao Zedong Thought, Deng Xiaoping Theory, the important thinking of the "three represents," and the scientific outlook on development were born in different periods and different leaders, many of them contain dialectical materialism and historical materialist methods, all of which are inseparable from the fundamental interests of the broad masses of the people. Seventy-three years of rapid development, the reason why we have today's situation is the result of the guidance of the theoretical system of socialism with Chinese characteristics. The 73-year-old journey is the vivid practice of the theoretical system of socialism with Chinese characteristics.

6. Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era

The post-epidemic era has brought economic and social development to a new era, but also brought many urgent and difficult problems. Under the tremendous pressure of the downturn of the globalized economy, the international situation has undercurrents, and the causes of instability in the political and economic environment have increased significantly. Since the 18th National Congress of the Communist Party of China, Persist in integrating the basic tenets of Marxism with China's specific realities and with

China's excellent traditional culture, and integrate and sort out the experience of the Party over the past few decades, innovatively put forward the idea of socialism with Chinese characteristics in the new era. Thought on socialism with Chinese characteristics in the new era, It is the product of the Sinicization and modernization of Marxism, the best proof that it conforms to China's national conditions, and an important theoretical and ideological guidance on the road to the great rejuvenation of the Chinese nation, which will promote the further rapid development of Marxism in China.

The process of summing up experience is to raise the rich practical achievements to the theoretical level, and extract the theory from the past history, experience, and the current actual situation to guide future practice and further develop the theory. Theory and practice advance together in the long river of time. In the international environment, China today is not what it used to be. China will not allow anyone to trample on it, from the time when it signed the ugly treaty with the Eight Power Allied Forces, to today, a hundred years later, it is on a par with the United States, which "dominates". The CPC has led the people to achieve such brilliant achievements, and adherence to correct theoretical guidance is inseparable.

If the Chinese nation wants to be among the best, it must adhere to the leadership of the CPC, and must not be without correct ideological guidance for a moment.
