# Beamhouse efficiency takes perfect balance.

Making leather on time, on spec and within budget requires a careful balance of chemistry and process. Buckman enables tanneries to master that balance with our comprehensive Beamhouse & Tanyard Systems. They include advanced chemistries that not only protect the hide but also maximize the effectiveness of each process, level out the differences in raw materials and reduce variations in batch processing. The result is cleaner, flatter pelts. More uniform characteristics. And improved area yield.

In addition, we offer unsurpassed expertise and technical support to help solve processing problems and reduce environmental impact with chemistries that penetrate faster, save processing time, improve effluent and enhance safety.

With Buckman Beamhouse & Tanyard Systems, tanneries can get more consistent quality and more consistent savings. Maintain the perfect balance. Connect with a Buckman representative or visit us at [Buckman.com](http://Buckman.com).

# Leather is pure nature – and that feels good

**We have created a polymer composed of 93% renewable materials** MAGNOPAL® Pure A is a film-forming bio-polymer and primary ingredient of the Wet-end process. It is based on vegetable biomass, a staggering 93% of which consists of renewable materials. It's free of acrylates, formaldehyde, phenol and naphthalene and is a pioneer in shifting to non-petrochemical leather manufacturing.
