Labor education is an important carrier for the implementation of quality education and it is also essential to promote students' all-round development to foster virtue through education). The all-round development is the coordination of morality, intelligence, physique and aesthetics, and labor. Based on the concept of seaside education, along with the core value of being acceptable and kind, the school aims at cultivating students with the characteristic of willing to learn and accept, strong and brave. Also, the school broadens the time and space of seaside labor activities, fully developing the all-round education, constructing seaside labor curriculum to improve the all-round development, as a result, to form an integrated system through a comprehensive way.
