

PREFACE

The 22nd North American Moose Conference and Workshop was held at the Lord Beaverbrook Hotel in Fredericton, New Brunswick, May 5-9, 1986. In total, 61 participants from most jurisdictions in North America and three colleagues from Sweden, registered for the conference.

A paper session and modeling workshop supported the conference theme of "Moose Population Dynamics". Additional sessions on habitat, physiology and management filled out the conference.

Tim Timmermann was presented the "Distinguished Moose Biologist Award" for his long standing contribution to the North American Moose Conference and Workshop and his work in moose management and research.

The New Brunswick Department of Forests, Mines and Energy sponsored the conference. Moosehead Breweries hosted the reception. Active participation from all attendees, high quality papers and presentations, and diligent moderators produced a successful and rewarding conference. A special thanks to the members of the New Brunswick moose conference committee; Stacey Spencer, Bob Currie, Gilles Godin, Jeff Patch, Gary Moore, Bob Watt, Tom Pettigrew and Tom Reid.

Thanks to all.

Arnold H. Boer
