

FRASCATI WORKSHOP 2013

The Tenth International Workshop on

MULTIFREQUENCY BEHAVIOUR OF HIGH ENERGY COSMIC SOURCES

Palermo, Sicily, Italy, May 27 – June 1, 2013

Edited by

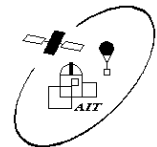

Franco Giovannelli & Lola Sabau-Graziati

UNIVERSITÄT
TÜBINGEN

Workshop on Multifrequency Behaviour of High Energy Cosmic Sources

Palermo, Sicily, Italy May 27 - June 1, 2013

Organizing Institutions

Istituto di Astrofisica e Planetologia Spaziali IAPS-INAF, Roma, Italy
Dpt de Cargas Utiles y Ciencias del Espacio, DCUCE-INTA Madrid, Spain
E.O. Hulburt Center for Space Research, HCA-NRL, Washington D.C., USA
Max-Planck Institut fr Extraterrestrische Physik, MPE, Garching, Germany
St. John's College, SJC, Annapolis MD, USA
Institute für Astronomie und Astrophysik, Karls Eberhard, Universität SAND 1,
Tübingen, Germany
ASCR - Astronomical Institute, Ondřejov, Czech Republic
CTU - Czech Technical University, Prague, Czech Republic

Scientific Organizing Committee

James Howarth Beall, HCA-NRL & SJC
Franco Giovannelli, INAF-IAPS (Chairperson)
Thomas Boller, MPE
Lola Sabau-Graziati, INTA-DCUCE
Andrea Santangelo, IAA, Universitt Tübingen
René Hudec, ASCR & CTU, Prague, Czech Republic

Local Organizing Committee

Franco Giovannelli, INAF-IAPS (Istituto di Astrofisica e Planetologia Spaziali) (Chairperson)
Daniela Giovannini, CNR-IBCN (Istituto di Biologia Cellulare e Neurobiologia)
Paolo Persi, INAF-IAPS (Istituto di Astrofisica e Planetologia Spaziali)
Francesco Reale, CNR- ISC (Istituto dei Sistemi Complessi)

FOREWORD

The workshop on **Multifrequency Behaviour of High Energy Cosmic Sources** is a classical biennial meeting held in the same historical place for our workshops: the beautiful and wild island of Vulcano. Unfortunately, because of the Eolian Hotel is closed for repairs, this tenth edition of our workshop has been developed in Palermo at the Splendid Hotel La Torre.

We are completely convinced that a deep discussion on the multifrequency behaviour of high energy cosmic sources, defined mostly by the physical processes rather than the types of objects, is the most powerful way for a better and faster development of our knowledge of the physics governing our Universe. For this purpose, we invited distinguished colleagues representative the most important space- and ground-based experiments of the present generation. They painted the whole panorama on the experimental results and on their interpretation by using current models and/or developing new ideas for a better comprehension of the detected phenomena. During the discussion of a lot of new results, obtained along most of the electromagnetic spectrum, we have learned that the astrophysics of galactic sources is still extremely interesting and unavoidable. Indeed it provides crucial information on the same physical processes occurring also in the extra-galactic sources, with obvious different scale factors. Moreover, new results coming from very high energy γ -ray experiments have shown the richness — and its potential increase — of the sky at those energies having detected hundreds cosmic sources until few years ago completely unknown, but hopefully to be detected since the cosmic ray spectrum extends up to energies as high as $\geq 10^{20}$ eV. The fluxes of very high energy γ -rays are attenuated because of their interactions with the cosmic radio, microwave, infrared and optical radiation fields. Measurements of the flux attenuation can then provide important information on the distribution of such fields. Then, very high energy γ -ray astronomy is the most powerful tool for solving the problem about the origin of cosmic rays.

Many thanks to the authors, that accepted our reminders recalled at the beginning of the workshop, for keeping to schedule. However, in spite of the accurate respect of the dead line of a number of authors, we still suffer a delay in publishing these proceedings because of the laziness of a considerable part of other authors. In spite of this, these proceedings will appear roughly within one year from the workshop date.

This is the tenth edition of the workshop (tenth if we consider the first historical one, held in Vulcano in 1984), whose proceedings are published in the international czech journal ‘Acta Polytechnica’.

We would like to thank all participants and especially the speakers for their active contributions in rendering this workshop updated with their talks, alive with their discussions, and friendly with their attitudes. Particular thanks to Mr Francesco Reale for his excellent assistance for informatics in Roma, during the preparation of the workshop, and for his faultless assistance in Palermo.

A special thank to Daniela Giovannini for her help during the critical moments of the registration of participants.

We are grateful to the pianist Maestra Valentina Usai, to the violinist Maestro Alessandro Perpich and to the actresses Lisa Colosimo and Flavia Giovannelli for their wonderful performance “Hic Habitat Felicitas: Mozarterie from the Kingdom Behind”.

Many thanks to:
the director of the Istituto di Astrofisica e Planetologia Spaziali of the Istituto Nazionale di Astrofisica (IAPS-INAF) (Dr Pietro Ubertini);
the CAEN S.p.A. (Viareggio) who partially supported the organization of this workshop.
Particular thanks to the Plan Nacional de I+D+i of Spain for partially supporting the publication of this book.
Finally, we would like to thank Mr Daniele Inzerillo, the Chef of the Splendid Hotel La Torre, who delighted us with his creations during our stay and to the whole staff of the Hotel for their professionalism and kindness.

The Editors
Franco Giovannelli & Lola Sabau-Graziati

List of participants

Amati Lorenzo , INAF-IASF, Bologna, Italy
amati@iasfbo.inaf.it

Ambrosino Filippo , La Sapeinza University, Roma, Italy
filippo.ambrosino@roma1.infn.it

Anderson Gemma , University of Southampton, UK
gemma.anderson@hotmail.com

Arnaud Monique , CEA Service d'Astrophysique, Gif sur Yvette, Saclay, France
monique.arnaud@cea.fr

Aschenbach Bernd , PRV Vaterstetten, Germany
bernd.aschenbach@t-online.de

Auriemma Giulio , Universit degli Studi della Basilicata, Italy
Giulio.Auriemma@cern.ch

Barret Didier , IRAP, Toulouse, France
didier.barret@irap.omp.eu

Barrière Nicolas , Space Sciences Lab - UC Berkeley, CA, USA
barriere@ssl.berkeley.edu

Beall James H. , SSD-NRL, Washington DC, USA
beall@sjca.edu

Behar Ehud , Technion. Haifa, Israel
behar@physics.technion.ac.il

Beilicke Matthias , Washington University in St.Louis, LA, USA
beilicke@physics.wustl.edu

Bisnovatyi-Kogan Gennady , Space Research Institute, IKI, Moscow, Russia
gkogan@iki.rssi.ru

Blay Pere , GACE–LPI–Universidad de Valencia, Spain
pere.blay@uv.es

Boller Thomas , MPE, Garching, Germany
bol@mpe.mpg.de

Bordas Pol , IAAT & ISDC, Tübingen, Germany
pol.bordas@uni-tuebingen.de

Buckley David , Southern African Large Telescope, Cape Town, South Africa
dibnob@sao.ac.za

Castellina Antonella , INAF–OATo and INFN, Torino, Italy
castelli@to.infn.it

Castro Cerón José María , Villanueva de la Cañada, Madrid, Spain
josemari@alumni.nd.edu

Colafrancesco Sergio , School of Physics - Wits University, Johannesburg, South Africa
sergio.colafrancesco@wits.ac.za

Costamante Luigi , Dipartimento di Fisica, Università di Perugia, Italy
luigic2011@gmail.com

Dar Arnon , Technion, Israel Institute of Technology, Haifa, Israel
arnon@physics.technion.ac.il

De Laurentis Mariafelicia , Dpt Scienze Fisiche, Università "Federico II", Napoli, Italy
felicia@na.infn.it

de Ugarte Postigo Antonio , IAA–CSIC, Granada, Spain
adeugarte@gmail.com

Della Valle Massimo , INAF–Osservatorio Astronomico di Capodimonte, Napoli, Italy
dellavalle@na.astro.it

Di Sciascio Giuseppe , INFN–Sezione di Roma Tor Vergata, Italy
disciascio@roma2.infn.it

Ebisawa Ken , JAXA/ISAS, Sagamihara, Japan
ebisawa@isas.jaxa.jp

Moshe Elitzur , University of Kentucky, KY, USA
moshe@pa.uky.edu

Fargion Daniele , Dipartimento di Fisica, Università "La Sapienza" di Roma, Italy
daniele.fargion@roma1.infn.it

Federici Memmo , INAF-IAPS, Roma, Italy
memmo.federici@iaps.inaf.it

Georganopoulos Markos , University of Maryland, Baltimore County, NASA-GSFC, Baltimore, MD, USA
georgano@umbc.edu

Giovannelli Franco , INAF-IAPS, Roma, Italy
franco.giovannelli@iaps.inaf.it

Gómez de Castro Ana Inés , Universidad Complutense de Madrid, Spain
aig@mat.ucm.es

Guainazzi Matteo , European Space Agency, Villanueva de la Cañada, Spain
Matteo.Guainazzi@sciops.esa.int

Harms Benjamin , University of Alabama, AL, USA
bharms@bama.ua.edu

Hudec René , Astronomical Institute Academy of Science, Ondřejov & CTU Prague, Czech Republic
rene.hudec@gmail.com

Iglesias-Groth Susana , Instituto de Astrofísica de Canarias, La Laguna, Spain
sigroth@iac.es

Katsuda Satoru , RIKEN, Wako, Saitama, Japan
satoru.katsuda@riken.jp

Kreykenbohm Ingo , Dr Karl Remeis Observatory & ECAP, Bamberg, Germany
Ingo.Kreykenbohm@sternwarte.uni-erlangen.de

Krumpe Mirko , ESO, Garching, Germany
mkrumpe@ucsd.edu

Kundt Wolfgang , Argelander Institute of Bonn University, Germany
wkundt@astro.uni-bonn.de

Lott Benoit , CENBG, Gradignan, France
lott@cenbg.in2p3.fr

Maeda Keiichi , Kavli IPMU, University of Tokyo, Japan
keiichi.maeda@ipmu.jp

Marshall Herman , MIT, Cambridge, MA, USA
hermanm@space.mit.edu

Martino Bruno Luigi , CNR-IASI (Istituto Analisi dei Sistemi ed Informatica), Roma, Italy
brunolmartino@gmail.com

Meintjes Pieter , University of the Free State, Bloemfontein, South Africa
meintjppj@ufs.ac.za

Meli Athina , University of Gent, Dept. of Physics and Astronomy, Gent, Belgium
ameli@phys.uoa.gr

Merafina Marco , Dipartimento di Fisica - Università "La Sapienza" di Roma, Italy
marco.merafina@roma1.infn.it

Milano Leopoldo , Dipartimento di Scienze Fisiche, Università "Federico II", Napoli, Italy
