Subject Index: CIT Vol. 16 (2008), Nº 1–4

802.11 MAC, 81

Ad-hoc networks, 119
Affine invariants, 169
Aggregate data, 225
Aggregation, 1
Analysis of means, 287
ANOM, 287
Assessment, 303
Audio indexing, 183
Audio segmentation, 183
Autonomous learning, 247

Back up repaired, 91
Business model, 43

Chebyshev, 1
"Cloud" computing, 235
Cloud modelling, 35
Codebook, 145
Codebook-preprocessing, 145
Completeness, 43
Complex wavelet transform (CWT), 57
Compressive load, 209
Computational geometry, 119
Computer graphics, 35
Computer model, 209
Confocal microscopic images, 145
Conics, 169
Content-based image retrieval, 57
Coordinated checkpointing, 23
Corpus-based speech synthesis, 69
Correspondence analysis, 295

Data cache, 317
Data dissemination, 197
Data model, 345
Data warehouse, 279
Database, 317
Database cache, 317
DCF, 81
Decision support systems (DSS), 279
Development context, 157
DICE, 345
Distributed systems, 23
Divisive clustering method, 225
Domain of knowledge, 303
DPM, 109
DSR, 91
Dyadic wavelet transform, 169
Dynamical systems, 255

E-learning, 271
End-to-end quality of service, 235
Experience capture, 157

Fault-tolerant, 333
Feature space, 43
Fine-grained concurrency, 339
Finite elements, 209
Flexible educational model, 303
Futures, 339

Gaining insights, 247
Genetic algorithm, 101, 311
Geometric transformations, 169
Grid computing, 101
Grid resource discovery, 333

Hashing, 197
Hierarchical PLS multiblock, 279
Human language technologies, 69
Hurst parameter, 15
Hypercube, 333

IEEE 802.11e, 131
Image mining, 295
Image processing, 325
Independent component analysis, 169
Information visualization, 271
Interval-valued data, 225
IP traceback, 109

Kinematic parameters, 279
Knee joint, 209
Knowledge representation, 345
Lazy task creation, 339
Learning, 303
Limit cycles, 255
Love dynamics, 255
LRD, 15

Machine learning, 247
MANET, 91
Mathematics scores, 287
Memory database, 317
Memory hierarchy, 339
Mental models, 271
Metaheuristic, 101
Method fragments, 157
Method tailoring, 157
Metrics, 1
Mixed models, 287
Mobile computing, 197
Model quality evaluation, 43
Modeling, 311
Motion detection, 325
Multimedia, 325
Multiobjective optimization, 1

National Assessment, 287
Natural phenomena, 35
Neural networks, 271
Niching, 101

Ontology, 303
OPNET, 131
Optical force sensor, 209
Optimizations, 311

Pattern recognition, 169
p-dimensional hypercube, 225
Performance, 1
Photovoltaics, 311
Power control, 119
Principal component analysis, 225

Quality of Service (QoS), 81, 131

Random, 1
Rate distortion, 145
Real-world emissions, 279
Recovery, 23
Reflection, 157
Ring networks, 23
Roaming, 131
Robotic discovery, 247
Routing, 119
RTS/CTS frames, 131

Self-configuring protocol, 333
Self-similarity, 15
Sensor networks, 119
Sequencing, 81
Shewhart procedure, 287
Solar cells, 311
Soundness, 43
Speaker clustering, 183
Speaker diarization, 183
Speaker recognition, 183
Speaker tracking, 183
Speech detection, 183
Speech synthesis, 69
SQL, 317
SRD, 15
Stable route selection algorithm, 91
Static resilience, 333
Stochastic, 1
Support vector machine (SVM), 57
Symbolic data analysis, 225
System dynamics, 255

TDD, 345
Texture image retrieval, 57
Topology, 109
Traffic profile, 15
Typed mind map, 345

Utility computing, 235

Vector quantization, 145
Virtual computing lab, 235
Virtualization, 235
Visualization, 295
VoIP, 131
Volumetric modelling, 35

Wavelet transform, 15
Web cache, 317
Weights, 1
Wiki, 271
Window-based fast search, 145
Wireless data broadcast, 197
Wireless grid, 101
Wireless LANs, 119
Wireless sensor networks, 325
WLAN, 131

XML, 345
