Subject Index: CIT Vol. 15 (2007), Nº 1–4

802.1x, 237

Adaptive streaming, 215
Added variable, 287
AES, 237
AODV routing protocol, 61
Application integration, 71
Artificial intelligence (AI), 25
Authentication, 237
Automatic classification, 71

BJT, 331
Box-Cox transformation, 287
Broadband access network, 17

CMOS logic gates, 85
Complexity, 151
Conceptual modeling, 7
Confidentiality, 237
Constrained synthesis, 1
Constructed variable, 287
Conversational game theory, 111
Cross-lingual alignment, 295
Cross-lingual understanding, 295
Cross-media alignment, 295
Cross-media understanding, 295
CTL, 171

Data mining, 161
Data transfer, 347
Deceptive theory, 161
Decision tree based classification, 161
Deficiencies of WEP, 237
Dialogue management, 111
Dialogue system, 111
Dialogue-system evaluation, 111
Diffusion breaks, 85
Digital Subscriber Line (DSL), 17
Discrete wavelet transform, 1
Distributed systems, 7
Document management, 71
DoS attack, 61

Educational game, 319
Educational performance indicators, 313
Energy consumption management, 185
Ensemble algorithm 305
Entropy, 151
Euler path, 85
Even vertices, 85
Experiments, 325
Expert system, 227
Expert systems, 33

Fading environments, 257
Fault-tolerance, 131
Federated databases, 95
Free text retrieval, 71
Fuzzy back propagation, 267
Fuzzy logic, 33
Fuzzy neuron, 267

Game design, 319
Genetic algorithm, 215
Genre classification, 305
Genre features, 305
Grid, 347
GridFTP 347

Higher order cumulants, 257
Higher order moments, 257
Hot-decking, 313

IDS 227
IEEE 802.11, 215
Image acquisition, 71
Image processing, 1
Inhibitor arc, 195
Instructions, 25
Integrated Access Device (IAD), 17
Integrity, 237
Intrusion detection, 61
Intrusion index, 227
Intrusion, 227

JFET, 331

k-server problem, 325

LAEV data integration approach, 95
Learning by teaching, 319
Lemmatisation, 47
Linux, 131
Lowest consumption, 185
LTL, 171

Masking, 287
Measurement, 331
Medical data, 123
Metrics, 151
Minimization of layout area, 85
Minimization of odd vertices, 85
Mobile networks, 215
Modeling, 331
Morpho-syntactic description, 47
MOSFET, 331
Moving windows, 325
Multi-language text extraction, 71
Multimedia requirement, 195
Multimedia streaming, 215
Multipath transport, 215
Multiple imputation, 313
Multi-resolution, 1

Natural language, 25
Network information management, 17
Network processor, 61

Network security, 227
Non-parametric Markovian models, 1
Non-stationary Markovian models, 1

Object-oriented data model, 95
Object-oriented design, 7
Object-oriented, 151
OCL, 171
Odd vertices, 85
On-line algorithms, 325
On-line problems, 325
Open-source, 131
Operating system, 131
Optical networks, 7
Optimization, 331
Outliers, 287

PARADISE framework 111
Parameter extraction, 331
Performance evaluation 61
Petri nets, 171
Power line communications, 185
Preemptor hyperarc, 195
Proactive buffering, 215
Problem-based learning, 319
Programming language, 25

RC4, 237
Real-time, 131
Referential schema, 95
Reflection, 319
Restoration, 1
Robust estimation, 287
Roundabout with four approach intersections, 33

Scattered data, 123
Scheduling, 131
Security Agent, 61
Security threats to 802.11, 237
Semantic metrics, 151
Semiconductor device, 331
Service-oriented architecture, 339
Short term load prediction, 267
Signal type classification, 257
Slovenian language, 47
Smooth surface, 123
Software agents, 185
Sparse data, 123
SSO, 227
Statistical machine translation, 47
Statistical pattern recognition, 257
Stopwatch, 195
Street lighting, 185
Support vector machine, 257
Surface reconstruction, 123
Synchronizing scheme, 195

Text analysis, 295
Thin plate model, 123
Time Petri net, 195
TKIP, 237
Traffic signaling, 33
Translation model, 47
Tunnel lighting, 185

UML, 171
UML-based profile, 7

Validation, 171
Video transport, 215
Viewpoint approach, 95
Viewpoint schema, 95
Visualization, 339
Voice over Digital Subscriber Line (VoDSL), 17

Web page, 305
Web services, 339
WEP protocol, 237
Wizard-of-Oz experiment, 111
WLAN safety improvements, 237
Work function algorithm (WFA), 325
