## Classified Advertising

### NOTICE

Respondents to advertisers offering faculty "rank" and "status" are advised that these terms are ambiguous and should inquire as to benefits involved.

All advertisements submitted by institutions offering positions must include a salary range. The range should provide the applicant with an indication of the salary the institution is willing to provide for the position offered.

All advertisements for the Positions Wanted and the Positions Open classifications will be edited to exclude direct or indirect references to race, creed, color, age, and sex as conditions of employment.

Classified advertising orders and copy, and cancellations, should be addressed to the Advertising Department, 50 East Huron Street, Chicago 60611, and should reach that office before the second of the month preceding publication of issue desired. Copy received after that time may be held for the next issue.

Rate for classified advertising is \$1.25 per printed line. No additional charge is made for nonmember advertising.

## SCIENCE CITATION INDEX®

the reference that sheds  
a whole new light  
on literature searching...

*first place to look...for anything*

**Science Citation Index — the uniquely effective search tool that organizes the world's current scientific and technical journal literature by the author's own reference citations — retrieves more pertinent articles on almost any given subject, faster, than any other reference of any kind.**

So it's the first place to look when you want to search the journal literature. For maximum certainty of finding what you're after. For speed and ease of finding it, too.

SCI® is based on the fact that one of the best guides to the subject matter of a scientific article is its bibliography — the people and articles the author himself cited to support his own work. It's called "citation indexing". And study after study has shown this method of organizing the journal literature more effective than conventional indexing systems.

What's more, the Science Citation Index is completely multi-disciplinary — covering every article in every issue of more than 2,400 scientific journals from all over the world. So you need only look in this one, instead of a number of different references.

The next time you need to know what's been published in any specific area of science and technology, turn first to the Science Citation Index. Chances are you'll turn to it first (and last) each time after that. For more on what the Science Citation Index can do for you, send for our free brochure.

*The name of Frances Neel Cheney is a distinguished one in contemporary American librarianship. Member of the Reference and Subscription Books Review Committee of ALA, writer of a monthly column on current reference books for Wilson Library Bulletin, professor at The Peabody School of Library Science, she is supremely well qualified to write this book.*

## FUNDAMENTAL REFERENCE SOURCES

### FRANCES NEEL CHENEY

FUNDAMENTAL REFERENCE SOURCES provides an introduction to selected sources of bibliographical, biographical, linguistic, statistical, and geographical information, and offers detailed suggestions for effective use of these sources in selection, acquisition, and cataloging of library collections.

As a textbook in library school courses, or in day-to-day use by librarians, FUNDAMENTAL REFERENCE SOURCES is an indispensable handbook, in the tradition of Shores' *Basic Reference Sources*—now out of print—and of Winchell's *Guide to Reference Books*.

# Xerox Microfilms:

(our attempt to grow a little smaller.)

We've grown famous with copiers. Scientific with computers. And quite big in the whole area of information management.

Now we'd like to grow in another direction with Xerox microfilms.

And since we have quite a reputation to uphold, you can be sure we're offering more than a copy.

We think our microfilms are a little better, more consistent, and a lot easier to use (whatever equipment and chemicals you prefer). And we'll gladly provide free samples to prove it. We have Negative Anti-halation Undercoated XMH (16, 35, 105mm)

for planetary cameras; Negative Dyeback XMD (16mm) for flow-type cameras; and Positive XMP (16 and 35mm) for contact film printers.

One other thing: To simplify ordering, speed deliveries, and reduce your inventories, you can order it direct from your local Xerox Sales Office for fast shipment from our Regional Supply Centers. Consult your telephone directory.

That's another original from Xerox Corporation, Business Products Group, Dept. HR, Rochester, New York 14603.

# NATIONAL FACULTY DIRECTORY—1971

## READY NOW!

### HERE'S WHAT REVIEWERS HAVE SAID:

**HIGHER EDUCATION BOOK REVIEW** "The *National Faculty Directory* is a thorough and comprehensive volume and an invaluable source material for personnel in the academic community and otherwise. A 'must' reference aid in any administrative-academic office." (July 1, 1970)

**AMERICAN LIBRARIES** "Right straight out of a data bank in crisp, easy-to-read, five column, 8½ by 11 inch pages, this is a must for every library reference crew." (July-August, 1970)

**SCIENCE BOOKS: A QUARTERLY REVIEW** "This should prove to be a widely used reference in colleges, universities, public libraries, educational and professional organizations, etc. . . . Highly recommended." (September, 1970)

... AND THE FIRST EDITION WAS INCLUDED IN *COLLEGE AND RESEARCH LIBRARIES'*  
"SELECTED REFERENCE BOOKS OF 1969-70" (JANUARY, 1971)

**A REFERENCE WORK OF PROVEN USEFULNESS**—The comments above concerning the usefulness of the first edition of *NFD* will be even more true of the Second Edition, which covers scores of additional schools (including selected Canadian colleges) and nearly 60,000 more faculty members than the highly praised 1970 edition.

**1971 EDITION EXTENSIVELY REVISED**—Arranged alphabetically by faculty names, the listings in the 1971 *NFD* have been carefully confirmed or revised on the basis of recent catalogs and faculty lists. Information furnished on each of the nearly 380,000 members of teaching faculties and major administrators includes the individual's name, institution name, departmental designation, street address if necessary, and city, state, and zip. There is, for the first time, a list of the approximately 2,800 schools covered.

**COVERAGE INCREASED IN 1971**—Over ninety-five percent of teaching faculty members and major administrators in the United States can be located with the aid of *NFD*. The next time you need to find out "who's where" in the academic world, you can confidently turn to *The National Faculty Directory* for current, complete information.
