

A Symposium of a Different Kind

*Sarah Barbara Watstein
Social Sciences/Documents
Bobst Library
New York University*

On October 28, 1983, members of the academic and research library communities from New York, New Jersey, and the Delaware Valley will examine the structure, processes, and control of technology by studying a library-oriented case study with social scientists and their colleagues. The symposium, "Life on the Technology Express," is sponsored by ACRL chapters in those areas. Princeton University is the setting for the symposium, and the mythical Garfield University is the setting for the case study.

Why is Garfield University Library's fate at stake? And what does that have to do with you and your library?

Garfield University's new president, Wiley Dyer, has recently had a paper accepted for publication in *Future Trends*. This paper, "Rethinking the University Library," has been widely circulated on campus. Garfield University librarians are familiar with the fact that Dyer is a futurist, but his opinion that the university's social function is that of an information processor has caused murmurs and raised eyebrows.

Dyer contends that as an information processor, the university performs the same essential functions as all processors, whether brains, bureaucracies, or computers. These include: input, storage, processing, control, and output. Within this context, Dyer believes that the library fulfills a major part of the university's information storage function. Comparing the library to the university's computer system, Dyer questions the library's purpose, proper functions, and reason for existing. As a cost-conscious administrator, he predicts that emerging technologies such as microcomputers, interactive networks, and storage devices, promise to change drastically if not eliminate the justification for the library.

As a librarian at Garfield, you are aware that your major constituencies—university faculty, administrators, and students—have been forced to rethink basic questions concerning the library. Must the library be a building or a place? If it is a place, is it one place, several places, or many? Should these places be differentiated among input/output, storage and processing functions, in some other way, or not at all? If it is not a place, should the identification of "library" be retained? Whom should the library serve? Why does the university have a library?

As this background reveals, the case is complex and the issues it raises have implications for all aca-

ademic and research library staff who are affected by the forces of technology. The case will be highlighted during the symposium and used as a vehicle for group discussion.

The symposium will also include a keynote address by Irving Louis Horowitz, Hannah Arendt Distinguished Professor of Sociology and Political Science, Rutgers University; an overview of the case study by Karin Trainer, Associate Librarian, Yale University Library; general analysis of the case in small group discussions with library leaders; functional analysis of the case in similar groups; and reflections on the case and a closing address by James Beniger, Assistant Professor of Sociology, Program in Science and Human Affairs, Princeton University. The symposium schedule also allows for self-guided tours of the Princeton campus, libraries and museums, and includes a reception at Prospect House.

October 28 marks an exciting departure in the design and structure of library-oriented programs, conferences, or workshops. A run-of-the-mill day for symposium participants? Hardly! The case is purposely designed to stir up participants, and the symposium promises to be provocative, exciting, and stimulating. ■■

PIERCY AWARD

The Esther J. Piercy Awards Committee of ALA's Resources and Technical Services Division is accepting nominations for the 1984 citation.

The candidates for the award can be nominated by anyone who is well acquainted with the candidate's contribution to librarianship in the field of technical services. The award will be given to a librarian with not more than 10 years of professional experience who has shown outstanding promise for continuing contributions and leadership in any of the fields comprising technical services by such means as: 1) leadership in professional associations at local, state, regional, or national levels; 2) contribution to the development, application, or utilization of new or improved methods, techniques, and routines; 3) a significant contribution to professional literature; or 4) conduct of studies or research in technical services.

Each nomination shall consist of a cover form, a resume, a statement of qualifications and accomplishments of the nominee, and appropriate supporting evidence. Nominations should be submitted no later than December 1, 1983.

Nomination forms may be obtained from: Don Lanier, Chair, Esther J. Piercy Award Jury, 613 Ball Avenue, DeKalb, IL 60115. ■■

Information is a resource

...so are the people who manage it.

Librarians play a vital role in paving the way toward a more well-informed society. With your help, we gain an awareness of the importance of information and develop the skills required to deal with it effectively.

To aid your efforts, ISI offers a program of special recognition to reward and encourage advances in the fields of library and information science.

We view this program as a positive reinforcement for excellence; an incentive to those gifted persons who can make significant contributions to the information community. And most of all, this program is ISI's way of saying, "We need more people like *you!*"

For more information on any aspect of our program, please contact Susan McDonald, Director of Communications.

ISI's Program of Special Recognition

Outstanding Information Science Teacher Award—administered by the American Society for Information Science (ASIS); \$500 awarded annually to individuals who demonstrate sustained excellence in teaching information science.

Samuel Lazerow Fellowship—administered by the Association of College and Research Libraries (ACRL); \$1,000 grant honoring outstanding contributions to acquisition or technical services in an academic or research library.

Samuel Lazerow Lecture Series—delivered annually at various universities with departments of library or information science; distinguished speakers are selected by the host universities.

Frank Bradway Rogers Information Advancement Award—administered by the Medical Library Association; \$500 awarded annually to a librarian who has made an outstanding contribution to the application of technology in delivering health sciences information.

Doctoral Dissertation Scholarship—administered by the ACRL; \$1,000 awarded annually to a student working on a dissertation on academic librarianship.

ISI Information Science Doctoral Dissertation Scholarship—administered by ASIS; \$1,000 awarded annually to a doctoral student working on his or her dissertation.

ISI/Special Libraries Association Scholarship—\$1,000 given annually to a beginning doctoral candidate.

Outstanding Paper Award—£250 awarded annually in recognition of the author of the best paper published in the *Journal of Information Science* of the Institute of Information Scientists. Administered by the journal.

INSPEC
The Institution of Electrical Engineers

The world's most comprehensive information service in computing

INSPEC covers all aspects of the subject — software, hardware from micros to mainframes, systems and the whole range of computer applications. To do this, INSPEC scans over 500 journals, numerous conference proceedings, reports and books.

Details of the journals have been collected in a new publication *Periodicals in Computing* which is available free of charge.

To obtain your free copy, just clip the coupon below and return it to:

UK

INSPEC Marketing Department,
