vision. This condition can be a strength if U.S. libraries will think global, really global, and act local. Otherwise, the United States will likely abdicate any international leadership role in new scholarly communication models. The challenge for U.S. libraries is to make the effort to see the bigger picture and find ways to align our disparate parts to create a better whole in the long run. SCOAP3 offers a promising new approach worthy of our support to pursue next steps.
