Christopher Dawson's Religion and Progress is a masterly exposition of this truth. Not until the nineteenth century did the notion of a completely de-religionized order of society appear in men's thinking. Even the French intellectuals who prepared the French Revolution were Deists of a sort, and Robespierre himself even staged a great feast of the Supreme Being. The fathers of our country were certainly Deists or more, as the preamble to the Declaration of Independence demonstrates. It remained for Proudhon and Marx to state plainly and unqualifiedly that religion was a humbug. Finally, it is not yet thirty years since, for the first time in the world's history, a great

as is this sense in some cases, it is counterpart, and its followers. So

Not so its origins. They go far back. In sketching them I shall follow Doctor Johnson's analysis, reminding you that he writes as a Protestant and not as a Catholic. He starts with what he calls the "Medieval synthesis," the essence of which was that religion should furnish ethical standards not only for private conduct but also for "the governance of business and trade." Whatever may be said of men's behavior in the Middle Ages -which we will consider to include the eleventh to the thirteenth centuries-men's thinking on human life was saturated with ligion, that is with Christianity. All scholars agree as to the fact. Some deplore it, others regret its passing; none deny it. Doctor Johnson dates the rise of secularism from the fragmentization of ·Christianity in the sixteenth century as a result of the Reformation. Here are his own words:

"As a Protestant I share the connation formally took its stand up- viction of those who see authentic on a sweeping derial of religion as values in the Reformation, but I such. ligion of the Golden Rule.

It was and is an excellent rule -no doubt about that. Moreover men were, on the whole in those days, practising it not so badly. They were on the whole kindly disposed toward each other. They observed, on the whole, the decent customs, the conventions, the traditions of their forefathers, they generally kept their promises to each other and their hands off each other's property. What they did not realize was that they were spending a capital accumulated for them by their ancestors who had held a definite Christian faith, and that the capital was limited. was limited because it was neither earning interest nor being replenished. In short, the humanitarianism of the nineteenth century and since is a legacy from a Chris-

which many liked to call the re- called Christendom, and the legacy is being exhausted, as we are now beginning at least to suspect, if not clearly to recognize. The terrible fact is that Christendom has been gradually, indeed rapidly, ceasing to be Christian. It is true that in Christendom-the Western World -there was always a residue of what we call paganism, sometimes more of it, sometimes less. The modern form of paganism is secularism, and today this new paganism has reconquered and now occupies a larger part of Christendom than paganism has ever occupied since the Middle Ages. This is perhaps the most characteristic feature of the age in which we live. But the worst thing about it is that it is a paganism devoid of that vague but real reverence for the unseen which permeated the Greek and the Roman mind to the last, when the best elements of both were taken over and baptized by Christianity. Today it is their worst elements which have risen tian faith which has largely evap- up in war against Christianity itorated over what we have long self, and their name is Secularism.

Accordingly, it is conceivable that a totalitarian Party might appear somewhere, professing to sponsor as its own ideology the Christian faith. In that case the temptation to look upon such a Party with favor might prove very strong, especially if the membership were restricted to Catholics. The great modern Popes have dealt with this problem. I think that the reigning Holy Father, Pius XII, has commented on it with special incisiveness and authority. Referring to the fear of many outside the Church that in preaching the Gospel with missionary fervor she is seeking to usurp civil authority and to exact submission, he says, in the

For centuries great Christian thinkers have observed with alarm the slow rise of ideological forces knitted together by their common repudiation of the Judaeo-Christian faith —that is, of the Revelation given in the Old Testament, and in the New, which was to fulfill the Old and give it transcendent significance, and of the moral principles enshrined in both Testaments. Mr. Woodlock has spoken that gradual and extensive turning away from this faith to which the name of "secularism" is applied. > It is a first principle of Catholic belief that the rights of man are not bestowed upon him by virtue of any circumstance of race, color, creed, or class. Neither may they be withheld from him by any government or temporal authority. The Church has maintained from the beginning that the individual's rights are his inalienable birthright, given to him as a human being, by God, and that no government may deprive him of his inherent right to exercise his free will to resist what his conscience denounces as evil.

That principle, which is the sine qua non of the Declaration of Independence and the Bill of Rights, was succinctly expressed in the writings of Cardinal Bellarmine in the fifteenth century. This paragraph is the really astounding and mystifying fact about the American Revolution. Its fearless and uncompromising postulates plumbed the very depth of philosophy and theology. This paragraph reached down to the bedrock of religious and political principle, and after sweeping that bedrock clean of all equivocation and compromise, it etched into its eternal surface a clear design of the American Constitutional System.

In the great libraries of Philosophy, Theology, and Political were scattered Science that throughout the world in 1776, Jefferson and his associates could have found ample and complete justification for the principles they inserted into the birth certificate of our Republic. In the first century, St. Paul had written concerning the equality of man as follows: "There is neither Jew nor Greek, there is neither bond nor free, there is neither male nor female. For you are all one in Christ Jesus" (III Galatians 26: 28).

"The Kingdom is not made for the King but the King for the Kingdom, for God has constituted Kings to rule and govern and to secure to everyone the possession of his rights; such is the aim of their institution: but if Kings, turning things to their own profit, should act otherwise

they are no longer Kings but tyrants" (De Reg. Princ., Cap. II).

St. Thomas wrote this 500 years before the American Revolution. Nevertheless, it sounds very much Jefferson's references George III.

Going into the seventeenth century, the Founding Fathers would have discovered the Jesuit, Francis Suarez, saying that "Nature made man positively free with an intrinsic right to liberty," and that "the State has legitimate power over private persons and their goods only in so far as this is necessary for their due government" (De. Leg., LIICx IVN 16, 19). Here Father Suarez is saying substantially what the Decrich and in-laration of Independence said 150 spiriting accumulations of early years later, namely: "to secure saints and scholars, they would these rights, Governments are inhave found in the thirteenth cen- stituted among Men," and that tury writings of St. Thomas Aquin- when government goes beyond the as substantially all of the principles scope of that special agency, it's

> In the comprehensive writings of Cardinal Robert Bellarmine, the Founding Fathers would have discovered the most pointed of all precedents supporting the philosophy of the Declaration. How well they were acquainted with the works of Bellarmine is a matter of speculation. However, here are

all of which were written more erican than 150 years before 1776:

In a commonwealth all men are born naturally free and the people themselves hold the political power so long as they have not transferred this power to some King or Ruler" (De Clericis, Ch.

"The law is manifestly not repugnant to true liberty; for its purpose is not to impede the choosing of good and the rejection of evil but to promote the exercise and enjoyment of liberty" (De Laicis, Ch. X).

This operation of religious cause and democratic effect is a persistent and characteristic feature of American law and government. #### THE PURPOSE OF THE CATHOLIC HOUR

(Extract from the address of the late Patrick Cardinal Hayes at the inaugural program of the Catholic Hour in the studio of the National Broadcasting Company, New York City, March 2, 1930.)

Our congratulations and our gratitude are extended to the National Council of Catholic Men and its officials, and to all who, by their financial support, have made it possible to use this offer of the National Broadcasting Company. The heavy expense of managing and financing a weekly program, its musical numbers, its speakers, the subsequent answering of inquiries, must be met. . . .

This radio hour is for all the people of the United States. To our fellow-citizens, in this word of dedication, we wish to express a cordial greeting and, indeed, congratulations. For this radio hour is one of service to America, which certainly will disten in interestedly, and even sympathetically, I am sure, to the voice of the ancient Church with its historic background of all the centuries of the Christian era, and with its own notable contribution to the discovery, exploration, foundation and growth of our glorious country. . . .

Thus to voice before a vast public the Catholic Church is no light task. Our prayers will be with those who have that task in hand. We feel certain that it will have both the good will and the good wishes of the great majority of our countrymen. Surely, there is no true lover of our Country who does not eagerly hope for a less worldly, a less material, and a more spiritual standard among our people.

With good will, with kindness and with Christ-like sympathy for all, this work is inaugurated. So may it continue. So may it be fulfilled. This word of dedication voices, therefore, the hope that this radio hour may serve to make known, to explain with the charity of Christ, our faith, which we love even as we love Christ Himself. May it serve to make better understood that faith as it really is—a light revealing the pathway to heaven: a strength, and a power divine through Christ; pardoning our sins, elevating, consecrating our common every-day duties and joys, bringing not only justice but gladness and peace to our searching and questioning hearts.
